4.35B Commercial Labor Exploitation – is a new element required by RHY  
4.44 HP Screening Score – is a new element required by SSVF  
4.45 VAMC Station Number – is a new element required by SSVF  
4.47 T-cell (CD4) and Viral Load – is a new element required by HOPWA  
Notes were added in blue to provide information on frequently asked questions received via the HUD:Exchange Ask A Question forum. |

Introduction

To end homelessness, a community must know the scope of the problem, the characteristics of those who find themselves homeless, and understand what is working in their community and what is not. Solid data enables a community to work confidently towards their goals as they measure outputs, outcomes, and impacts.

A Homeless Management Information System (HMIS) is the information system designated by a local Continuum of Care (CoC) to comply with the requirements of CoC Program interim rule 24 CFR 578. It is a locally-administered data system used to record and analyze client, service and housing data for individuals and families who are homeless or at risk of homelessness. HMIS is a valuable resource because of its capacity to integrate and unduplicate data across projects in a community. Aggregate HMIS data can be used to understand the size, characteristics, and needs of the homeless population at multiple levels: project, system, local, state, and national. The Annual Homeless Assessment Report (AHAR) is HUD’s annual report that provides Congress with detailed data on individuals and households experiencing homelessness across the country each year. This report could not be written if communities were not able to provide HUD with reliable, aggregate data on the clients they serve.

In 2010 the U.S. Interagency Council on Homelessness (USICH) affirmed HMIS as the official method of measuring outcomes in its Opening Doors: Federal Strategic Plan to Prevent and End Homelessness. Since then many of the federal agencies that provide McKinney-Vento Act and other sources of funding for services to specific homeless populations have joined together and are working with HUD to coordinate the effort.

HMIS is now used by the federal partners and their respective programs in the effort to end Homelessness, which include:
U.S. Department of Health and Human Services (HHS)
U.S. Department of Housing and Urban Development (HUD)
U.S. Department of Veterans Affairs

The HMIS Data Standards (published in the 2014 HMIS Data Dictionary and HMIS Data Manual) provide communities with baseline data collection requirements developed by each of these federal partners.

This manual is designed for CoCs, HMIS Lead Agencies, HMIS System Administrators, and HMIS Users to help them understand the data elements that are required in an HMIS to meet participation and reporting requirements established by HUD and the federal partners.

HUD is responsible for coordinating the collection of data, oversee HMIS rules and regulations, and report to Congress through the AHAR, and will continue to manage the HMIS regulations, provide support and guidance to local CoCs and HMIS Lead Agencies, and provide guidance to users in collaboration with the federal partner agencies. The 2014 release of the Data Dictionary and Manual is the first joint publication of HUD and the federal partners and is intended to provide guidance to communities around federal expectations for HMIS.

About this Manual

This Manual is intended to serve as a reference and provide basic guidance on HMIS data elements for CoCs, HMIS Lead Agencies, HMIS System Administrators and users. This release is 2014 HMIS Data Manual, Version 3 and is an update to the 2014 Data Standards Manual. HUD has updated the Manual to reflect critical data standard changes that were needed in 2015 as well as some answers to HMIS Frequently Asked Questions (indicated in blue font with a ₪ symbol)

Companion HMIS documents include:

- The HMIS Data Dictionary, which defines all of the data elements and requirements for HMIS compliance for HMIS Vendors and System Administrators.
- The HMIS Project Descriptor Data Elements Manual, which defines project descriptor elements necessary for HMIS Lead Agencies and System Administrators to use in project set-up
- A series of Program Specific Manuals, which are designed specifically by and for each of the federal partner programs which use HMIS. They include:
  - HHS: PATH Program HMIS Manual
  - HHS: RHY Program HMIS Manual
  - HUD: CoC Program HMIS Manual
  - HUD: ESG Program HMIS Manual
  - HUD: HOPWA Program HMIS Manual
  - VA: Programs HMIS Manual

There are many software products on the market that communities across the county have chosen to use as their HMIS. Each product has unique features and was built to meet the different data collection needs of each community. Each software vendor should provide the guidance, support, and
documentation necessary for the CoC to understand the system they are using. CoCs are responsible for ensuring their HMIS is compliant with the HMIS Rule and the HMIS Notices published by HUD.

This manual is structured as follows:

1. The Key Issues and Concepts section provides guidance on key issues, concepts, and information necessary for system administration of projects that participate in HMIS.
2. HMIS Project Setup section provides information for system administrators in utilizing the Project Descriptor Data elements for project setup and optional Housing Inventory Count (HIC) reporting.
3. The Universal Data Elements section provides information on data elements required to be collected by all projects using an HMIS as part of a CoC implementation. This includes all projects funded by any of the HMIS federal partners and those projects that receive other funding, including those who receive no federal funding.
4. The Program-Specific Data Elements section is broken into multiple subsections that describe: program specific elements required by more than one federal partner and elements various HMIS Federal Partner Programs require just for their projects. Not every Program-Specific Data Element is required by every federal partner.

Key Issues and Concepts

Project vs Program

Across the federal agencies the terms project and program are used differently. In this document, and for the purposes of data collection in HMIS, a program refers to the federal funding source (e.g., HUD CoC, HHS PATH, VA SSVF, etc).

A project refers to a distinct unit of an organization, which may or may not be funded by HUD or the federal partners, that provides services and/or lodging and is identified by the CoC as part of its service system. A continuum project can be classified as one that provides lodging (lodging project) or one that does not provide lodging (services project).

Lodging Project: Provides overnight accommodations and whose primary purpose is to meet the specific needs of people who are homeless. This includes projects classified as the following under the data element Project Type: Emergency Shelter, Safe Haven, Transitional Housing, Rapid Re-Housing, Permanent Supportive Housing, Permanent Housing with Services, and Permanent Housing: Housing Only.

Services Project: Does not provide lodging and whose primary purpose is to provide services that meet the specific needs of people who are homeless or at risk of homelessness. This includes projects classified as the following under the data element Project Type: Coordinated Assessment, Homelessness Prevention, Street Outreach, Day Shelter, Services Only, and Other.
Federal Partners and Programs

The HMIS Federal Partners worked collaboratively to develop the 2014 HMIS Data Standards. HUD has worked with program staff of the federal partners to align the data elements required for each program funding source and determine how and when data is to be collected. The federal partners and their programs include:

- U.S. Department of Housing and Urban Development (HUD)
  - Office of Special Needs Assistance Programs (SNAPS)
    - Continuum of Care (CoC) Program
    - Emergency Solutions Grants (ESG) Program
    - Housing Opportunities for Persons with AIDS program (HOPWA)
    - HUD-Veterans Affairs Supportive Housing (HUD/VASH)
    - Rural Housing Stability Assistance Program (RHSP)
- U.S. Department of Health and Human Services (HHS)
  - Administration for Children and Families (ACYF) – Family and Youth Service Bureau (FYSB)
    - Runaway and Homeless Youth (RHY)
  - Substance Abuse and Mental Health Services Administration (SAMHSA)
    - Projects for Assistance in Transition from Homelessness (PATH)
- U.S. Department of Veteran Affairs (VA)
  - Supportive Services for Veteran Families Program (SSVF)
  - Community Contract Emergency Housing (HCHV/EH)*
  - Community Contract Residential Treatment Program (HCHV/RT)*
  - Domiciliary Care (HCHV/DOM)*
  - VA Community Contract Safe Haven Program (HCHV/SH)*
  - Grant and Per Diem Program (GPD)*
  - Compensated Work Therapy Transitional Residence (CWT/TR)*

*Participation in HMIS is not required as part of a funding requirement except for SSVF. The federal partners recognize that communities record Project Descriptor Data Elements and Universal Data Elements in order to facilitate completion of the HIC and PIT.

- It is possible multiple federal funding sources will be used in a single project (e.g. a transitional housing project may be funded by both the CoC and RHY). This Manual outlines the requirements each of the HMIS federal partners has for data collection. When a project is funded by multiple federal partners, it is important that all elements required by each of the federal partners are collected and that appropriate reporting can be produced according to each funder’s requirements.

- All projects throughout an implementation area that serve homeless persons regardless of their funding sources are permitted and encouraged to participate in HMIS, with the exception of victim services provider projects (defined by Violence Against Women Reauthorization Act of 2013). Projects that choose to participate in HMIS without any funder requirement to do so should, at minimum, collect Universal Data Elements and those elements required for Performance Measurement or are established for project types by local community requirements. They may also collect any appropriate Program Specific Elements needed for the project’s own reporting purposes.
**Element Information**

The 2014 HMIS Data Standard data elements do not constitute a client assessment tool. The federal partners expect CoCs to work to develop their own data collection protocols in order to properly assess client housing and service needs.

The following key concepts about each data element are outlined in this manual:

1. **Rationale** – provides a basic rationale for data collection for the element.

2. **Collection Point(s)** defines when data collection is required for each element. There are five different collection points:

   - **Record creation** – Indicates the element is required to be collected when the client record is created. Certain data elements such as personal identifiers are necessary to create a unique client record. Data elements that must be collected at the point of “client record creation” are those that will have only one value for each client in the HMIS (e.g., Name). The information is collected and entered into HMIS when the client record is first created in the system. Data must be reviewed at each project entry and can be edited at any time to correct errors or to improve data quality.

   - **Project entry** – Indicates the element is required to be collected at every project entry. These data elements are associated with a discreet project entry. A client might have multiple entries for the same data element, but each will be associated with a different project entry and there should only be one value for each data element for each project entry. Data elements that must be collected at the point of “project entry” are those that must be collected at every project entry and must reflect the client’s circumstances on the date of that project entry. Regardless of the exact date these data elements are collected or entered into HMIS, the information date associated with the elements should correspond to the project entry date and data should be accurate for that date. Edits made to correct errors, enter additional information related to project entry but provided by the client later (e.g., social security number), or improve data quality will not change the data collection stage or the information date. Data collected at project entry must have an **Information Date** that matches the client’s **Project Entry Date**. Information must be accurate as of the **Project Entry Date**. There must be only one record with a Data Collection Stage of ‘project entry’ for each relevant data element for any given project entry.

   - **Update** – These data elements represent information that is either collected at multiple points during project enrollment in order to track changes over time (e.g., Income and Sources) or is entered to record project activities as they occur (e.g., Services Provided). The frequency with which data must be collected depends on the data element and the funder requirements. Additional guidance for each funder and data element is provided in Program-Specific Manuals. These elements are transactional and historical records must be maintained, along with the dates associated with their collection. The **Information Date** must reflect the date on which the information is collected and/or the date for which the information is relevant for reporting.
purposes. Information must be accurate as of the Information Date, regardless of when it is actually collected or entered into HMIS.

**Annual assessment** – Is a specialized subset of the ‘update’ collection point. The annual assessment must be recorded no more than 30 days before or after the anniversary of the client’s Project Entry Date, regardless of the date of the most recent ‘update’ or ‘annual assessment’, if any [annually]. Information must be accurate as of the Information Date.

For HUD-funded programs and HUD reporting purposes, the implementation of ‘annual assessment’ as a data collection stage by vendors is mandatory; the data collection stage must not be inferred from the Information Date, although the field must have an Information Date recorded with it. In order to be considered reportable to HUD as an annual assessment, data must be stored with a Data Collection Stage of ‘annual assessment.’

There must be only one record for each data element annually with a Data Collection Stage recorded as ‘annual assessment’ associated with any given client and project entry ID within the 60-day period surrounding the anniversary of the client’s Project Entry Date. Regardless of whether the responses have changed since project entry or the previous annual assessment, a new record must be created for each subsequent annual assessment such that it is possible to view a history, by date, of the values for each data element.

**Project exit** - Indicates the element is required to be collected at every project exit. Data elements identified with the “project exit” stage must be collected at every project exit. Like project entry data, a client must have only one value for each of these data elements in relation to a specific project enrollment, but a client could have multiple project exits and exit data associated with each. Regardless of the exact date that it is collected or entered into HMIS, the data must accurately reflect the client’s response or circumstance as of the date of project exit; the information date must correspond to the project exit date. Edits made to correct errors or improve data quality will not change the data collection stage or the information date. Elements collected at project exit must have an Information Date that matches the client’s Project Exit Date and a Data Collection Stage of ‘project exit.’ Information must be accurate as of the Project Exit Date.

Data associated with the “Annual Assessment” and “Update” collection points requires the user to add new information while the system maintains the historical data. Data associated with the other stages can be edited to correct errors or to improve data quality at any time, but only the most current value is expected to be stored and used for reporting purposes. A series of examples is provided below to illustrate the difference between an update and a correction.

**Example 1:** A client who was not receiving any benefits on the date of project entry begins receiving Medicaid during the project stay. It is important to retain information about the client’s status at project entry, so the record showing no Non-Cash Benefits at that time should remain unchanged and a new entry of Non-Cash Benefits created to show that the client is receiving Medicaid as of a specific date. The data collection stage of the new record will be ‘Update.’ The information date of the new record could be entered as the date the client started receiving Medicaid, the date the information was collected, or some other date as long as the data in the record accurately reflects the Non-Cash Benefits a client was receiving on that date.
Example 2: A client enters a project that has required collection points for income information at project entry and update (every 90 days). At the time of project entry, the client had no income. The caseworker documents this in a record with a data collection stage of ‘Project Entry’ and an Information Date that matches the Project Entry Date. When the client is interviewed 90 days later, the client still has no income. Even though there is no change in the client’s income, a new entry must be created with a data collection stage of ‘Update’ and an Information Date that is 90 days after the project entry date. The new entry indicates that the information is current and the client’s income has not changed. If a new entry is not created, it is not possible to use HMIS data to determine whether the information is current.

Example 3: A caseworker notices that a client’s Total Monthly Income was incorrectly entered as $100 at project entry, when the client’s income was actually $1,000. The appropriate action is to edit the record to change the $100 to $1,000. As long as the record accurately reflects the client’s income as of the Project Entry Date, the data collection stage remains ‘Project Entry’ and the Information Date matches the project entry date. A separate metadata element, Date Updated, is used to track the date of the edit for audit purposes.

Example 4: A client refused to respond to Developmental Disability at intake but later discloses that they were diagnosed with a developmental disability as a child. The appropriate action is to edit Developmental Disability to change ‘Client Refused’ to ‘Yes.’ The client was disabled as of the date of project entry. The data collection stage is ‘Project Entry’ and the information date must match the Project Entry Date. A separate metadata element, Date Updated, is used to track the date of the edit for audit purposes.

3. Subjects identifies the persons for whom data collection is required.

**Head of household:** data collection is limited to the head of household. Head of household is the term used in these standards for consistency with other guidance previously developed and does not necessarily indicate the individual’s status in the household. CoCs and HMIS Lead Agencies may elect to further define the head of household for their jurisdiction or may also substitute the concept of “primary client” for the term.

**Head of household and other adults in the household:** data must be collected about the head of household and each additional adult in the household. If the household is composed of an unaccompanied child, that child is the head of household. If the household is composed of two or more minors, data must be collected about the minor that has been designated as the head of household.

Where a group of persons apply for services together (as a household or family), information about any children under the age of 18 may be provided by the head of household who is applying for services. The children are not required to be present at the time the head of household applies for services. However, information should not be recorded for children under age 18 if it is indicated that these children will not be entering the project on the same day as the head of household. Information for these children should be recorded when the children join the project. Information on any other adults (18 years of age or older) who are enrolled in the project as part of the household should be obtained directly from that adult. As a general rule, one adult should not provide information for another adult. A project should
edit the project entry record of a client who turns 18 after entry, but before exit, to add a response for data elements only relevant to the head of household and other adults in the household in order to improve the reported overall data quality for the project or if required by a funder.

**All clients**: data must be collected about each adult and child in a household.

4. *Data Collection Instructions* provides overall instructions for data collection and entry. Collection instructions specific to an HMIS Federal Partner Program can be found in the HMIS Program Specific Manuals.

Most data elements include a ‘Client doesn’t know’ or ‘Client refused’ response category. These are considered valid responses if the client does not know or the client refuses to respond to the question. It is not the intention of the federal partners that clients be denied assistance if they refuse or are unable to supply the information. However, some information may be required by projects or public or private funders to determine eligibility for housing or services, or to assess needed services. The ‘Client doesn’t know’ or ‘Client refused’ responses should not be used to indicate that the case manager or data entry person does not know the client’s response. The HMIS Data Standards assume that fields for which data are not collected will be left blank (i.e., ‘missing’). In situations where a system requires a response to all data fields before saving a record, the system must use a specific response category to indicate that data were not collected. In such cases, that response category must be treated as missing data for reporting purposes. These response categories are specified in the HMIS Data Dictionary.

5. *Data Element Fields* identifies the specific fields and response required. More detailed element information for programming purposes can be found in the HMIS Data Dictionary.

For each data element provided in this manual, response categories are provided. For any data element, projects may choose to capture more detailed information as long as this information can be exactly mapped to the required response categories provided.

6. *Response Category Descriptions* provide the general definitions and descriptions of fields and responses. Program specific categories descriptions can be found in the HMIS Program Specific Manuals.

7. *Special Considerations* identifies special points of clarification an element may require.

$n$ Communities may choose to incorporate additional data elements they may find useful for local or state reporting purposes.

$n$ To the extent practical within the confines and location of the project real-time data entry is encouraged by all of the HMIS Federal Partners.
**Metadata**

The term *metadata* is often defined as ‘data about data.’ Instead of capturing information about a project or a client, Metadata Elements capture information about the data itself; when it was collected, when it was entered into HMIS, who entered it, and which project is responsible for it.

The Metadata Elements are intended to facilitate reporting from HMIS, to simplify the writing of programming specifications, and to provide an audit trail. The intent behind each of these Metadata Elements is explained in the Rationale section for each. These elements do not represent an attempt to standardize the way that HMIS solutions store data. As long as an HMIS solution is able to accomplish the purposes identified in the rationale for the Metadata Elements, the solution is not required to use the exact metadata elements listed here. Future programming specifications for reports will reference these Metadata Elements. A complete list of metadata elements and logic for those elements can be found in the HMIS Data Dictionary Project Setup Guidance.

**Project Descriptor Data Elements (formerly Program Descriptor Data Elements)**

In the 2004 and 2010 Data Standards, these were referred to as Program Descriptor Data Elements. The updated Data Standards begin to refer to these elements as Project Descriptor because they describe the project (or the unit of an organization which is providing the service or lodging).

The CoC must record project information in the HMIS on all projects within its implementation. In general, the HMIS Lead Agency should be the party with overall responsibility for adding, editing, and updating the Project Descriptor Data Elements. The HMIS Lead Agency in consultation with the CoC should also develop a plan and timeline for updating this information.

One of the most critical steps in accurate data collection and reporting is ensuring that a project is set up properly in an HMIS. If project setup is done incorrectly, this will jeopardize the ability to produce accurate, reliable reports. Guidance around project setup for each federal partner program type will be published separately as part of the Program Specific Manuals.

For example, one project might provide homelessness prevention services to some clients and rapid rehousing services to other clients. Further, each type of service could be funded through different funding streams and have separate reporting requirements. In these cases, in order to produce accurate reports, the HMIS Lead might need to set up two projects in the HMIS.

Additionally, projects required to produce an Annual Performance Report (APR), Consolidated Annual Performance and Evaluation Report (CAPER), or other federal report must include only clients who were served under the particular program or particular grant among many grants a single project could be awarded from a federal funder. If a project record is set up in HMIS to include projects receiving funding from more than one federal program, including those that might receive multiple concurrent or non-concurrent grants from a single federal program, then it must be possible to identify, for each client served, the specific federal program and grant award under which the client was served.

The following Project Descriptor Data elements are required to be completed for all projects entering data into the HMIS:

*Organization Identifier* – The name of the organization must be entered. It is highly recommended that the legal name of the organization, as it is shown on the grant agreement, is
entered in the HMIS. An Organization ID must be assigned to each project via an HMIS generated number or code. Each organization must receive a distinct identifier that is consistently associated with that organization.

*Project Identifier* – The name of each project must be entered. A Project ID must be assign to each project via an HMIS generated number or code. Each project must receive a distinct identifier that is consistently associated with that project.

*Continuum of Care Code* – The CoC code, as published annually by HUD in the CoC NOFA (https://www.HUDExchange.info/coc/) must be assigned to each project for every geographic area in which the project operates. Projects might be funded to provide for housing and/or services to clients residing in only one CoC (e.g., CoC: Transitional Housing), or they might be funded for housing and/or services across multiple CoCs. The CoC codes selected for the project must be consistent with the area served by the project according to the grant agreement with the federal funding partner. For example, a VA SSVF project providing services to clients in both a balance of state and urban CoC, must select the CoC code for both the balance of state AND the urban CoC.

*Project Type* – A single project type must be assigned to each project. General rules of project typing:

1. A project is to be assigned a type based on the lodging or service it is providing.
2. If a project has more than one residential project type, each type must be set up in HMIS as a separate project. (For example, an emergency shelter and a transitional housing project must be set up as two separate projects in HMIS, even if there is a single funding source for both).
3. A residential project that is funded under one or more separate grants to provide supportive services to 100% of clients of the residential project may be set up as a single project with the appropriate residential project type. All federal funding sources must be identified in 2.6 Federal Partner Funding Sources.
4. A project that provides street outreach must be typed “4 – Street Outreach”. (Note: a street outreach project that also has a direct service component serving persons other than “street homeless” will require two separate projects to be set up in an HMIS – a “4- Street Outreach” and a “6- Services Only”).
5. A project that provides only services (other than outreach), has associated housing outcomes, and is not limited to serving clients of one or more specific residential project should be typed as “6 – Services Only” and **Affiliated with a Residential Project** will be “No.”
6. A project that provides only services (other than outreach), has associated housing outcomes, and is restricted by its grant agreement to serve only clients of one or more specific residential projects should be typed as “6 – Services Only” and **Affiliated with a Residential Project** will be “Yes.” Each of the residential projects with which the services only project is associated must be identified.
7. A project that provides only services (other than outreach) that are “stand alone supportive services” and have no associated housing outcomes should be typed as “7 –
Other.” (For example, a project funded to provide child care for persons in permanent housing or a dental care project funded to serve homeless clients should be typed “7 – Other.” A project funded to provide ongoing case management should be typed “6 – Services Only.”)

**Method for Tracking Emergency Shelter Utilization** – Each emergency shelter project must be associated with one method of tracking residence. Careful selection of the method is critical for outcome reporting.

The *entry/exit method* should be used for all shelters requiring an entry, a continuous stay, and an exit. The length of stay will be calculated based on the number of nights between project entry and project exit and performance will include changes from project entry and project exit data collection stages. Funder preference for emergency shelter projects is the use of the project entry/exit date method except for projects where clients are permitted to enter and exit on an irregular basis (e.g., mass shelter).

The *night-by-night method* should be used for shelters that allow clients to enter and exit on an irregular basis and do not require a continuous stay and must instead rely on a method of tracking “bed nights”. In this method: (1) all data required to be collected at project entry is collected; (2) the project records every discrete date or series of dates that the client utilizes a bed; (3) the system maintains historical data on the nights sheltered; (4) the duration of each stay can be accurately determined and aggregated to calculate each client’s total length of stay in the project; and (5) the client may be exited or the system may be designed to automatically generate an exit after an extended absence. Length of stay is calculated on bed nights used in this method.

Utilization of the night-by-night method does not mean that an HMIS must identify a client in a specific bed. If the HMIS supports a custom module that identifies clients in a bed that module may continue to be used. However, use of that module does not necessarily equate with the new night-by-night model.

**Federal Partner Funding Source** – All projects that are funded by a federal partner must have each grant associated with the project recorded in the HMIS. The federal funding source information must include: the name of the federal partner program and component the grant is provided for; a grant identifier (grant number or other identification associated with the specific funding source); grant start date; and grant end date.

Note: Projects which only provide services and are funded under the HUD CoC Program after FY 2014 which provide services exclusively to clients of a single residential project type (other than emergency shelter) will be identified in 2.6 Federal Partner Funding Sources with the component type of the residential project(s) and not “Services Only”. These projects must still be classified with a Project Type of “Services Only.”

**Bed and Unit Inventory Information** - Communities must be able to identify household types served, bed types, Availability of the beds and units, and the number of beds and units for each continuum lodging project. Some systems enable a single record creation for each project with multiple options; others required a separate record for each option. For example, a project that
serves both households without children and households with at least one adult and one child might have a single record or two records for the two different types of Bed and Unit Inventory information in order to track inventory information by household type. If a project operates different types of beds (e.g., year-round and seasonal) then a separate record could be required for each bed type. For example, a project that serves single adults and has 100 beds, of which 20 are seasonal, might have two bed and unit inventory records. One record is for the 80 facility-based year-round beds for households without children and a second record is for the 20 facility-based seasonal beds for households without children.

The logic for the Project Descriptor Data Elements can be found HMIS Data Dictionary [link].

Generation of the HUD Housing Inventory Count (HIC) from an HMIS is optional. Various HMIS systems have the capacity to generate the HIC. Guidance for the HIC is published by HUD under HIC/PIT Submission Guidance on the HUD Exchange.

If the HMIS is used to generate the HIC, then every project in the CoC regardless of whether the project is operated by a contributing HMIS organization or a non-contributing HMIS organization must have all of the Project Descriptor data elements entered. If the HIC is generated then the following elements are required:

- **Site Information** identifies if the project is at the principal site, the HUD Geocode for each project, and site address.

- **Target Population** identifies the target population associated with a HUD grant.

The general purpose of these requirements is to ensure that the HMIS is the central repository of information about homelessness in the CoC, including information about projects and clients. Including Project Descriptor data in the HMIS ensures that uniform information about each CoC project is available to:

1. Complete required reports including the AHAR, and the HIC;
2. Track bed utilization;
3. Calculate rates of HMIS participation; and

Complete Project Descriptor information can also enhance the HMIS as a tool for supporting information and referral services.
Universal Data Elements

HMIS Universal Data Elements are elements required to be collected by all projects participating in HMIS, regardless of funding source.

The Universal Data Elements establish the baseline data collection requirements for all contributing CoC projects. They are the basis for producing unduplicated estimates of the number of people experiencing homelessness, accessing services from homeless assistance projects, basic demographic characteristics of people experiencing homelessness, and patterns of service use, including information on shelter stays and homelessness over time.

The Universal Data Elements are the foundation on which the Annual Homeless Assessment Report (AHAR) is developed. The AHAR provides Congress the national estimates of the current state of homelessness across the United States and the use of homeless assistance programs. It is used locally to inform state and local communities on how their specific homeless information compares nationally. The AHAR is used by the U.S. Interagency Council on Homelessness to measure progress towards goals specified in Opening Doors and by all of the federal partners to inform departmental homelessness policy. Universal Data Elements also helps local communities to better target resources, and position programs to end homelessness.

The following are the Universal Data Elements:

3.1 Name
3.2 Social Security Number
3.3 Date of Birth
3.4 Race
3.5 Ethnicity
3.6 Gender
3.7 Veteran Status
3.8 Disabling Condition
3.9 Residence Prior to Project Entry
3.10 Project Entry Date
3.11 Project Exit Date
3.12 Destination
3.13 Personal ID
3.14 Household ID
3.15 Relationship to Head of Household
3.16 Client Location
3.17 Length of Time on Street, in an ES or Safe Haven
3.1 Name

Rationale: The first, middle, last names, and suffix should be collected to support the unique identification of each person served.

Collection Point(s): At client record creation.

Subjects: All clients.

Data Collection Instructions: Projects should obtain and enter the full names and avoid aliases or nicknames.

Data Element Fields: 3.1 Name

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>First</td>
<td>(text)</td>
</tr>
<tr>
<td>Middle</td>
<td>(text)</td>
</tr>
<tr>
<td>Last</td>
<td>(text)</td>
</tr>
<tr>
<td>Suffix</td>
<td>(text)</td>
</tr>
</tbody>
</table>

Name Data Quality

- Full name reported
- Partial, street name, or code name reported
- Client doesn’t know
- Client refused

Response Category Descriptions:

- “Full name reported” should be selected for Name Data Quality as long as complete, full first and last names have been recorded. To avoid duplicate record creation, the full first name should be used (e.g., James vs. Jim) and the last name should be recorded as the individual has it recorded on their official legal documents (driver’s license, social security card, etc.)

- Select “Partial, street name or code name reported” in the following circumstances: 1) a partial, short, or nickname was used instead of the full first name; 2) a street name or code name was used for street outreach clients at initial intake and until the client was able to supply their full legal name; 3) a name modification was used for victims of domestic violence for security reasons; and 4) for any other reason the name does not match the clients full name as it would appear on identification.

- Select “Client doesn’t know” when client does not know their name. Use “Client doesn’t know” vs. “Partial, street name or code name reported” if you entered a false name/made up name in order to create a record in the system solely because the client did not know or was unable to provide their name.

- Select “Client refused” when client refuses to provide their name. Use “Client refused” vs. “Partial street name or code name reported” if you entered a false name/made up name in order to create a record in the system solely because the client refused to tell you their name.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None
3.2 Social Security Number

**Rationale:** The collection of a client’s Social Security number (SSN) and other personal identifying information are required for two important reasons. First, unique identifiers are critical to producing an accurate, unduplicated local count of homeless persons accessing services covered by HMIS. This is particularly true in jurisdictions where continuum projects do not share data at the local level and are, therefore, unable to use a Personal ID (Data Element 3.13) to de-duplicate (at intake) across all the continuum projects participating in the CoC’s HMIS. Where data are not shared, CoCs must rely on a set of unique identifiers to produce an unduplicated count in the central server once the data are sent to the HMIS Lead. Name and date of birth are useful unique identifiers, but these identifiers alone do not facilitate an unduplicated count of homeless persons as accurately as the SSN since names change and people share the same date of birth. Where data are shared across projects, the SSN greatly facilitates the process of identifying clients who have been served and allows projects to de-duplicate upon project entry.

Second, an important objective for ending homelessness is to increase access and utilization of mainstream programs by persons who are homeless or at-risk of homelessness. Since SSN is a required data element for many mainstream programs, such as Temporary Assistance for Needy Families (TANF), Medicaid, Supplemental Security Income (SSI), etc., projects may need the SSN along with the other personal identifiers in order to access mainstream services for their clients.

**Collection Point(s):** At client record creation.

**Subjects:** All clients.

**Data Collection Instructions:** In one field, record the nine-digit SSN. In another field, select the appropriate SSN Data Quality indicator. If a partial social security number is obtained an ‘x’ may be entered as a placeholder for any missing digit.

**Data Element Fields:** 3.2 Social Security Number

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social Security Number</td>
<td>(9 character text field)</td>
</tr>
<tr>
<td>SSN Data Quality</td>
<td>Full SSN reported</td>
</tr>
<tr>
<td></td>
<td>Approximate or partial SSN reported</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:**

- Select “Full SSN reported” for SSN Data Quality when a complete and valid SSN is provided.
- Select “Approximate or partial SSN reported” when any SSN other than a complete and valid 9 digit SSN, regardless of the reason, is provided.
- Select “Client doesn’t know” when a client does not know or does not have a SSN.
- Select “Client refused” when a client refuses to provide any part of their SSN.

**Special Considerations:** The federal statute at 5 U.S.C. Section 552a prohibits a government agency from denying shelter or services to clients who refuse to provide their SSN, unless the requirement was in effect before 1975 or SSN is a statutory requirement for receiving services from the project.

**Changes from 2014 - Version 2 Data Standards:** None
3.3 Date of Birth

Rationale: The date of birth is used to calculate the age of persons served at time of project entry or at any point during project enrollment. It also supports the unique identification of each person served.

Collection Point(s): At client record creation.

Subjects: All clients.

Data Collection Instructions: Collect the month, day, and year of birth for every person served.

Data Element Fields: 3.3 Date of Birth

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date of Birth</td>
<td>(date)</td>
</tr>
<tr>
<td>Date of Birth Type</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Full DOB reported</td>
</tr>
<tr>
<td></td>
<td>Approximate or partial DOB reported</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

Response Category Descriptions:

- “Full DOB reported” must be selected for Date of Birth Type when the complete date of birth is provided by the client.
- “Approximate or partial DOB reported” must be selected if a client cannot remember their full or exact date of birth. If the client cannot remember their birth year it may be estimated by asking the person’s age and calculating the approximate year of birth. If a client cannot remember the month or day of birth, record an approximate date of “01” for month and “01” for day. CoCs that already have a policy of entering another approximate date may continue their existing policy.
- Select “Client doesn’t know” if the client is unable to recall their age within one year. Use “Client doesn’t know” vs. “Approximate or partial DOB reported” if you entered an approximate or partial date of birth because the client did not know their date of birth within one year.
- Select “Client refused” when a client refuses to provide their DOB. Use “Client refused” vs. “Approximate or partial DOB reported” if you entered a partial or approximate date of birth in order to create a record in the system because the client refused to provide their date of birth or their age for you to approximate.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None
3.4 Race

**Rationale:** Race is used to count the number of persons who identify themselves within one or more of five different racial categories. In the October 30, 1997 issue of the Federal Register (62 FR 58782), the Office of Management and Budget (OMB) published “Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity.” All existing federal recordkeeping and report requirements must be in compliance with these Standards as of January 1, 2003. These data standards follow the OMB guidelines.

**Collection Point(s):** At client record creation.

**Subjects:** All clients.

**Data Collection Instructions:** In separate data fields, collect the self-identified race(s) of each client served. Allow clients to identify as many racial categories as apply (up to five). Staff observations should not be used to collect information on race.

**Data Element Fields:** 3.4 Race

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Race</td>
<td>American Indian or Alaska Native</td>
</tr>
<tr>
<td></td>
<td>Asian</td>
</tr>
<tr>
<td></td>
<td>Black or African American</td>
</tr>
<tr>
<td></td>
<td>Native Hawaiian or Other Pacific Islander</td>
</tr>
<tr>
<td></td>
<td>White</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:**

- “American Indian or Alaska Native” is a person having origins in any of the original peoples of North and South America, including Central America, and who maintains tribal affiliation or community attachment.
- “Asian” is a person having origins in any of the original peoples of the Far East, Southeast Asia or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand and Vietnam.
- “Black or African American” is a person having origins in any of the black racial groups of Africa. Terms such as “Haitian” can be used in addition to “Black or African American.”
- “Native Hawaiian or Other Pacific Islander” is a person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
- “White” is a person having origins in any of the original peoples of Europe, the Middle East or North Africa.
- “Client doesn’t know” or “Client refused” should only be selected when a client does not know or refuses to identify their race(s) from among the five listed races. Neither “Client doesn’t know” nor “Client refused” should be used in conjunction with any other response.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** None.
3.5 Ethnicity

Rationale: Ethnicity is used to count the number of persons who do and do not identify themselves as Hispanic or Latino.

Collection Point(s): At client record creation.

Subjects: All clients.

Data Collection Instructions: Collect the self-identified ethnicity of each client served. Staff observations should not be used to collect information on ethnicity.

Data Element Fields: 3.5 Ethnicity

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ethnicity</td>
<td>Non-Hispanic/Non-Latino</td>
</tr>
<tr>
<td></td>
<td>Hispanic/Latino</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

Response Category Descriptions: The definition of Hispanic or Latino ethnicity is a person of Cuban, Mexican, Puerto Rican, South or Central American or other Spanish culture of origin, regardless of race.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None.

3.6 Gender

Rationale: Gender is used to count the number of men, women, transgender, and other gender clients.

Collection Point(s): At client record creation.

Subjects: All clients.

Data Collection Instructions: Record the self-reported gender of each client served. Staff observations should not be used to collect information on gender.

Data Element Fields: 3.6 Gender

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gender</td>
<td>Female</td>
</tr>
<tr>
<td></td>
<td>Male</td>
</tr>
<tr>
<td></td>
<td>Transgender male to female</td>
</tr>
<tr>
<td></td>
<td>Transgender female to male</td>
</tr>
<tr>
<td></td>
<td>Other</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
<tr>
<td>(if Other) Specify</td>
<td>(text)</td>
</tr>
</tbody>
</table>

Response Category Descriptions: Transgender is defined as persons with a gender identity that is different from the sex assigned to them at birth. “Other” may include intersex individuals or persons who prefer not to identify a specific gender.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None.
3.7 Veteran Status

**Rationale:** Veteran status is used to count the number of clients who are veterans of the United States armed forces.

**Collection Point(s):** At client record creation.

**Subjects:** All adults.

**Data Collection Instructions:** Record whether or not the client is a veteran. Asking additional questions may result in more accurate information as some clients may not be aware that they are considered veterans. Examples include: “Have you ever been on active duty in the military?”

**Data Element Fields: 3.7 Veteran Status**

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Veteran Status</td>
<td>No, Yes, Client doesn’t know, Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** Respond “Yes” to **Veteran Status** if the person is someone who has served on active duty in the armed forces of the United States. This does not include inactive military reserves or the National Guard unless the person was called up to active duty.

**Special Considerations:** A project may collect this data element at entry for clients who are expected to turn 18 while enrolled or add a response to the data element to indicate the record is for a client who will turn 18 during enrollment in order to improve the overall data quality for the project or if required by a funder. An HMIS may automatically populate the **Veteran Status** field for clients who turn 18 during enrollment with a “No” response.

**Changes from 2014 - Version 2 Data Standards:** None.

3.8 Disabling Condition

**Rationale:** Disabling condition is used to count the number of clients who have a disabling condition at project entry. This data element is to be used with other information to identify whether a client meets the criteria for chronic homelessness.

**Collection Point(s):** At project entry.

**Subjects:** All adults.

**Data Collection Instructions:** Record whether the client has a disabling condition based on one or more of the following:

- A physical, mental, or emotional impairment, including an impairment caused by alcohol or drug abuse, post-traumatic stress disorder, or brain injury that:
  1. Is expected to be long-continuing or of indefinite duration;
  2. Substantially impedes the individual's ability to live independently; and
  3. Could be improved by the provision of more suitable housing conditions.
- A developmental disability, as defined in section 102 of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 (42 U.S.C. 15002); or
The disease of acquired immunodeficiency syndrome (AIDS) or any condition arising from the etiologic agency for acquired immunodeficiency syndrome (HIV).

Additionally for veterans note: if the client is a veteran who is disabled by an injury or illness that was incurred or aggravated during active military service and whose disability meets the disability definition defined in Section 223 of the social security act.

**Data Element Fields: 3.8 Disabling Condition**

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disabling Condition</td>
<td>No</td>
</tr>
<tr>
<td></td>
<td>Yes</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

*Response Category Descriptions:* Select “Yes” for Disabling Condition if any of the disabling condition criteria have been met.

*Special Considerations:* A project may wish to edit the record of a client who turns 18 during enrollment to add a response for this data element in order to improve the reported overall data quality for the project or if required by a funder.

A client receiving Supplemental Security Income (SSI), Social Security Disability Insurance (SSDI), VA Service-Connected Disability Compensation or VA Non-Service-Connected Disability Pension should be noted as a potential “Yes” for Disabling Condition.

For residential homeless assistance programs, client intake as part of the program admission process must be separated from the collection of disability information in order to comply with Fair Housing laws and practices, unless this information is required to determine program eligibility or is needed to determine whether applicants need units with special features or if they have special needs related to communication.

*Changes from 2014 - Version 2 Data Standards:* None

### 3.9 Residence Prior to Project Entry

**Rationale:** To identify the type of residence and length of stay at that residence just prior to (i.e., the night before) project entry.

**Collection Point(s):** At project entry.

**Subjects:** Head of household and adults.

**Data Collection Instructions:** Record the type of living arrangement of the head of household and each adult household member just prior to entry into the project. Members of the same household may have different residences prior to project entry.

**Data Element Fields:** 3.9 Residence Prior to Project Entry
<table>
<thead>
<tr>

</tbody>
</table>

*Response Category Descriptions:* Select the residence prior to project entry being careful to identify the correct subsidy, tenant based or project based housing, if the client had subsidized housing prior to entry.

*Special Considerations:* A project may wish to edit the record of a client who turns 18 during enrollment to add a response for this data element in order to improve the reported overall data quality for the project or if required by a funder. An HMIS may be set up to automatically populate this data element for clients who turn 18 during enrollment with the same response as that recorded for the head of household.

*Changes from 2014 - Version 2 Data Standards:* None
3.10 Project Entry Date

Rationale: To determine the start of a client’s period of participation with a project. All projects need this data element for reporting; residential continuum projects need it to measure lengths of stay, and services-only continuum projects need it to determine the amount of time spent participating in the project.

Collection Point(s): At project entry.

Subjects: All clients.

Data Collection Instructions: Project staff record the month, day, and year of project entry. The project entry date indicates a client is now being assisted by the project.

- For residential projects, with the exception of Permanent Housing-Rapid Re-Housing (PH-RRH) projects, this should be the first date of occupancy in the project.
- For PH-RRH projects and non-residential projects this should be the date on which the client began receiving services from the project or would otherwise be considered by the project funder to be a project participant for reporting purposes.
- For Street Outreach projects this should be the date of first contact with the client.

If there is a gap in occupancy (except for gaps allowed in Permanent Supportive Housing projects and Emergency Shelters using a night-by-night method), clients should be exited from the project; a return to the project should be recorded as a new residential/service record with a new project entry date.

Data Element Fields: 3.10 Project Entry Date

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Entry Date</td>
<td>(date)</td>
</tr>
</tbody>
</table>

Response Category Descriptions: None

Special Considerations: For residential projects that have activities or information the project needs to collect prior to occupancy a project may have a “pre-entry” project established to facilitate segregation of information for point-in-time and housing inventory count purposes.

Changes from 2014 - Version 2 Data Standards: None.

3.11 Project Exit Date

Rationale: To determine the end of a client’s period of participation with a project. All projects need this data element for reporting; residential continuum projects need it to measure lengths of stay, and services-only continuum projects need it to determine the amount of time spent participating in the project.

Collection Point(s): At project exit.

Subjects: All clients.

Data Collection Instructions: Project staff record the month, day and year of last day of occupancy or service. For residential projects this date would represent the last day of continuous stay in the project before the client transfers to another residential project or otherwise stops residing in the project. For
example, if a person checked into an overnight shelter on January 30, 2014, stayed overnight and left in the morning, the exit date for that shelter stay would be January 31, 2014.

For non-residential projects the exit date may represent the last day a service was provided or the last date of a period of ongoing service. The exit date should coincide with the date the client is no longer considered a project participant. Projects must have a clear and consistently applied procedure for determining when a client who is receiving supportive services is no longer considered a client. For example, if a person has been receiving weekly counseling as part of an ongoing treatment project and either formally terminates their involvement or fails to return for counseling, the last date of service is the date of the last counseling session. If a client uses a service for just one day (i.e., starts and stops before midnight of same day), then the Project Exit Date may be the same as the Project Entry Date.

Data Element Fields: 3.11 Project Exit Date

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Exit Date</td>
<td>(date)</td>
</tr>
</tbody>
</table>

Response Category Descriptions: None

Special Considerations: To minimize staff and client burden at shelters that require most (or all) clients to reapply for service on a nightly basis, the project can record the entry and exit date at the same time or an HMIS application can automatically record the exit date as the day after the entry date for clients of the overnight project.

A client with an open record (i.e. project entry without a project exit) for a community-defined extensive length of time in a shelter, outreach, or prevention project may be either automatically exited from the project or may be flagged for HMIS end user intervention and exit, depending on the functionality the HMIS supports. The actual exit date should be based on the last date of lodging or service provision. The length of time without client contact or activity that triggers a project exit should be locally determined based on project design and client profile. The CoC must be involved in the determination of “extensive length of time” and which projects the solution is to be applied.

For residential projects with data collection requirements after project exit, a project may have a separate follow-up project established.

Changes from 2014 - Version 2 Data Standards: None

3.12 Destination

Rationale: To identify where a client will stay just after exiting a project for purposes of tracking and outcome measurement.

Collection Point(s): At project exit.

Subjects: All clients

Data Collection Instructions: Select the response category that best describes where the client will be living after the date on which they exit the project. For non-lodging projects this may be the same as the place where the client was living during project participation.

Data Element Fields: 3.12 Destination

**(if Other) Specify** (text)

**Response Category Descriptions:**

- For clients who will be staying with family or friends select the response that includes the expected tenure of the destination (permanent or temporary).

- For “Rental by client” and “Owned by client,” select the response that includes the type of housing subsidy, if any, the client will be receiving. A housing subsidy may be tenant-, project-, or sponsor-based and provides ongoing assistance to reduce rent burden. This includes housing subsidies provided through HUD-funded subsidies (e.g., public housing, Housing Choice Voucher or “Section 8”) or other housing subsidy (e.g., state rental assistance voucher).

If a client exits without providing destination information to project staff, the “No exit interview completed” response value should be used; in such instances, destination information will be considered missing.
Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: The universe of persons the data is collected on has changed from Heads of Households and Adults to All clients. This change has been made to accommodate instances where the household does not leave all at the same time or to the same destination to improve accuracy.

3.13 Personal ID

Rationale: To obtain an unduplicated count of persons served within a CoC. Every client entered into an HMIS is assigned a Personal ID, which is a permanent and unique number generated by the HMIS application.

Collection Point(s): At client record creation.

Subjects: All clients.

Data Collection Instructions: Before creating a client record in HMIS, users must first search the HMIS application for an existing record for that client. If an existing record is found, enrollment and service data should be added to that record. If there is no existing record, a new record must be created; the HMIS application will generate a Personal ID for the new client record at the time it is added to the HMIS.

Data Element Fields: 3.13 Personal ID

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal ID</td>
<td>There is no specified format for this data element</td>
</tr>
</tbody>
</table>

Response Category Descriptions: This element requires the HMIS to generate the Personal ID; a user should not have to manually enter the Personal ID.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None

3.14 Household ID

Rationale: To count the number of households served in a project.

Collection Point(s): At project entry.

Subjects: All clients.

Data Collection Instructions: A Household ID will be assigned to each household at project entry and applies, for the duration of that project stay, to all members of the household served. The Household ID is automatically generated by the HMIS application.

If it is not evident to project staff whether others are applying for assistance with the person who is being interviewed, then project staff should ask if anyone else is applying for assistance with that person.

A common Household ID should be assigned to each member of the same household. Persons in a household (either adults or children) who are not present when the household initially applies for assistance and later join the household should be assigned the same Household ID that links them to the
rest of the persons in the household. The early departure of a household member should have no impact on the Household ID.

*Data Element Fields: 3.14 Household ID*

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Household ID</td>
<td>There is no specified format for this data element</td>
</tr>
</tbody>
</table>

*Response Category Descriptions:* A household is a single individual or a group of persons who apply together to a continuum project for assistance and who live together in one dwelling unit (or, for persons who are not housed, who would live together in one dwelling unit if they were housed). The HMIS should generate the *Household ID*. HMIS system instructions should be carefully reviewed to determine how a user is to identify the household within the system.

*Special Considerations:* An HMIS may track households at a global level over time as part of the HMIS system functionality. HMIS system instructions should clarify how a user identifies persons in the household using a more global system. This global system is allowed but is not required.

*Changes from 2014 - Version 2 Data Standards:* None

### 3.15 Relationship to Head of Household

*Rationale:* Identification of the heads of household for each household recorded in HMIS facilitates the identification, tracking and enumeration of households served by projects. In addition, specifying the relationship of household members to the head of household facilitates reporting on household composition.

*Collection Point(s):* At project entry.

*Subjects:* All clients.

*Data Collection Instructions:* The term “Head of Household” is not intended to mean the leader of the house; it is intended to identify one client to whom all other household members can be associated. There cannot be more than one head of household for any given project entry. Identify the head of household and the relationship of all other household members to the head of household for each household at project entry. If the head of household leaves the project while other household members remain, another member of the household currently participating in the project must be designated as the head of household and the other members’ relationship to head of household should be revised to reflect each individual’s relationship to the newly designated head of household in the event that it differs from the relationship to whoever was previously identified as the head of household.

- Children born during a residential project enrollment who are expected to live with the residential project enrollee should be entered into the HMIS as of their birth date.
- Children of custodial parents who may have regular, but not full-time, custody of the child (e.g. weekend, every other week, etc.) should enter them into the HMIS in a residential project if they are living with the parent during the project stay. However, if the visitation is so sporadic or short term you may house them without considering them in the reporting scenarios or HMIS. These situations don’t
have a one-size-fits-all ability. We suggest whatever method you use you document the rational and approach in your case files for monitoring purposes.

Generally, when a group of persons present together at a project as a household or family unit, no matter what the configuration is or if a minor is among the members, one of those persons must be designated as the head of household and the rest must have their relationship to the head of household recorded. However, if the group of persons are all youth being served by a project funded through RHY, each youth should be entered as its own record in its own household, and all RHY elements are required for each person, even if they are residing in one housing unit together.

It is important to do this so the RHY project can report correctly. If the group of youth presenting together indicate they are a family HUD recognizes them as a family and expects the CoC to recognize them as a family, but they should still be entered separately for RHY reporting purposes. Entering them separately should not be a barrier to or impact future interventions.

Data Element Fields: **3.15 Relationship to Head of Household**

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Relationship to Head of Household</td>
<td>Self (head of household)</td>
</tr>
<tr>
<td></td>
<td>Head of household’s child</td>
</tr>
<tr>
<td></td>
<td>Head of household’s spouse or partner</td>
</tr>
<tr>
<td></td>
<td>Head of household’s other relation member (other relation to head of household)</td>
</tr>
<tr>
<td></td>
<td>Other: non-relation member</td>
</tr>
</tbody>
</table>

Response Category Descriptions: A household is a single individual or a group of persons who apply together to a continuum project for assistance and who live together in one dwelling unit (or, for persons who are not housed, who would live together in one dwelling unit if they were housed).

Each CoC must develop guidelines for defining and designating a household member as the head of household and seek to ensure that those guidelines are applied consistently across participating continuum projects. Heads of household may be alternatively thought of as the “primary client,” the “eligible individual” etc., rather than as a fixed designation. A particular funder may provide instructions for determining which household member should be designated as the head of household in projects that they fund; in the event that the funder’s instructions are in conflict with CoC guidance, the requirements of the funder should supersede CoC guidance for the relevant projects.

Special Considerations: None

Changes from 2014 - Version 2 Data Standards: Minor clarification to data collection instruction.

### 3.16 Client Location

Rationale: The Client Location (HUD-assigned CoC Code) is used to link project client data to the relevant CoC and is necessary for projects that operate across multiple CoCs for data export purposes and to ensure accurate counts of persons who are served within a CoC.

Collection Point(s): At project entry and update.

Subjects: Head of household.
**Data Collection Instructions:** Select or enter the CoC code assigned to the geographic area where the head of household is staying at the time of project entry. If a client changes residence during the course of a project stay and moves into a different CoC then the CoC number must be updated; the Information Date for the update should be the effective date of the move.

**Data Element Fields:** 3.16 Client Location

<table>
<thead>

</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** An HMIS may automatically populate this field for projects that operate in only one CoC.

**Changes from 2014 - Version 2 Data Standards:** None

### 3.17 Length of Time on Street, in an Emergency Shelter, or Safe Haven

**Rationale:** Chronic homeless status is determined, by a client’s history of homelessness, disability status, and the length of time spent on the street, in an emergency shelter, or a Safe Haven. This element supports an HMIS’ ability to report on a client’s chronic status. As with all client-level data collection, this is self-report. Intake staff should ask clients about their homeless history, including specific instances the client spent on the street, in an emergency shelter, or Safe Haven project. However, intake staff should not instruct the client on the length of time or episodes necessary to qualify as chronically homeless. Responses should simply be the actual client responses.

**Collection Point(s):** At project entry.

**Subjects:** Heads of Household and Adults

**Data Collection Instructions:** Indicate the length of time the client has been on the streets (or other places unfit for human habitation), in Emergency Shelters (ES) or in Safe Havens (SH).

HUD strongly encourages HMIS users to just ask the client for the information and record their answer. Attempting to tie each individual’s response with definitions or documentation requirement is not the attempt of this question.

Although documentation is required by some funders for programs targeting chronic homeless persons, completing the data fields in HMIS does not require documentation -- a client’s responses are all that is required.

**Data Element Fields:** 3.17 Time on Streets, in an Emergency Shelter, or Safe Haven

</tbody>
</table>

**Response Category Descriptions:**

- **“The streets”** is being used as short-hand for any place unfit for human habitation (a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground).

- **Client entering from the Streets, Emergency Shelter (ES), or Safe Haven (SH).**
  - Residential projects: Enter yes, if the client indicates they are entering your residential project and the last place they slept was the streets, ES, or SH (see the [HMIS Project Descriptor Data Elements Manual](#), data element 2.4, for definitions of ES and SH).
  - Services projects: Enter yes if the client indicates that they are currently residing on the streets, ES, or SH.

- If the client entered from the Streets, ES, or SH, enter the actual or approximate date the client started staying in that homeless situation.

The key concepts to help determine the actual or approximate start date are:

1. Have the client look back to the date of the last time the client had a place to sleep that was not on the streets, ES, or SH.
2. As the client looks back, there may be breaks in their stay on the streets, ES, or SH. The breaks are allowed to be included in the look back period to calculate the approximate start date ONLY:
   a. If the client moved continuously between the streets, shelters, or safe havens. The date would go back as far as the first time they stayed in one of those places; or
   b. If the break in their time on the street, ES or SH was under 7 nights. A break is considered at least 7 or more consecutive nights not residing in a place not meant for human habitation, in shelter or in a Safe Haven. The look back time would not be broken by a stay less than 7 consecutive nights; or
   c. If the break in their time on the streets, ES, or SH was 90 days or less due to an institutional stay (i.e. jail, substance abuse or mental health treatment facility, hospital, or other similar
facility). The look back time would include all of those days (up to 90 days) when looking back for the start date.

3. If the client knows the month and year but not the day, the worker may substitute the day of the month with the same day of the month as project entry. For example: a client enters the project on March 15, 2015. During the intake interview, the client answers the start date question with a response of “a couple of months”. The worker clarifies - “It’s March, would that mean you started sleeping on the streets in January this year?” Client affirms, yes, January. The worker clarifies: “Do you know the day?” Client responds: “no.” - Worker then enters January 15 (day of the month of project entry), (this year).

4. If the HMIS displays information about the person’s entry date on the streets, ES or SH, the worker may share that information with the client to help jog their memory. However, administrative information may not be substituted for the information provided directly by the client or entered in the case that the client refuses to answer or does not know the answer, or in the case the data was not collected by the project for the client.

- Regardless of where the client stayed last night enter the number of times the client has been homeless on the streets, in ES, or SH in the past three years including today. Responses are either:
  - *Never in the past three years* - Meaning either the client has never been on the streets, in an ES, or SH; or the last time they were in any of those situations was longer than three years ago. If the client reports being homeless prior, but indicates that they did not stay in one of the identified places (streets, ES, or SH) this would be the correct response.
  - *This is the first time* - This is the first time the client has been on the streets, in an ES, or SH.
  - Enter two times, three times, four or more times, or client refused, client doesn’t know based on client responses.

An HMIS may be programmed to skip this question if the client’s approximate start date of homelessness was “365 days or more” from the date of project entry.

- **Total number of months homeless on the Streets, in ES, or SH in the past three years.** Responses are either:
  - *One month - this is the first month* - Meaning in the past three years this is the first month the client has resided on the Streets, ES, or SH.
  - *2-12 months* - Count the total number of months the client indicates they have been on the streets, ES, or SH in the past three years. If have been on the streets, ES, or SH since January and it is now March, the cumulative total would be 3 months (January = 1, February = 2, and March = 3). If they were also homeless for a month back in October, the cumulative total would then be 4 months.

Information should be gathered on all clients at project entry. For those with active records on October 1, 2015, the client should be asked the questions based on where they were prior to entry into the current project and the appropriate response recorded. If the client can’t remember, “client doesn’t know” is an acceptable response.
Status Documented: This question does not require documentation of the responses. It does not replace documentation requirements of chronic homelessness for projects that require such documentation.

Special Considerations: None

Changes from 2014 - Version 2 Data Standards: This element replaces the previous 3.17 (same name and number) with this new structure for information.

Program Specific Data Elements

Program Specific Data Elements differ from the Universal Data Elements in that no one project must collect every single element in this section. Which data elements are required is dictated by the reporting requirements set forth by each Federal partner for each of their programs. A Partner may require all of the fields or response categories in a data element or may specify which of the fields or response categories are required for their report. This section is organized to illustrate which Program Specific Data Elements are required by more than one Federal Partner and which are required by only one of the Federal Partners.

Local CoCs may elect to require all contributing continuum projects to collect a subset of the data elements contained in this section to obtain consistent information across a range of projects that can be used to plan service delivery, monitor the provision of services, and identify client outcomes. However, these data elements do not constitute a client assessment tool, and projects must develop their own data collection protocols in order to properly assess client service needs.

The following Program Specific Data Elements are required by more than one Federal Partner:

4.1 Housing Status
4.2 Income and Sources
4.3 Non-Cash Benefits
4.4 Health Insurance
4.5 Physical Disability
4.6 Developmental Disability
4.7 Chronic Health Condition
4.8 HIV/AIDS
4.9 Mental Health Problem
4.10 Substance Abuse
4.11 Domestic Violence
4.12 Contact
4.13 Date of Engagement
4.14 Services Provided
4.15 Financial Assistance Provided
4.16 Referrals Provided
4.17 Residential Move-In Date
4.18 Housing Assessment Disposition
4.19 Housing Assessment at Exit

4.1 Housing Status

Rationale: To identify the housing status and risk for homelessness for persons just prior to project entry, including whether persons are homeless, housed and at risk of homelessness, or in a stable housing situation. This data element allows projects to identify persons according to homeless and at risk criteria established by HUD.

Collection Point(s): At project entry.

Subjects: Head of household and adults.

Federal Partner Requiring Collection: HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]
Data Collection Instructions: For each client, determine the appropriate Housing Status according to the definitions below based on the client’s housing and related conditions just prior to project entry as determined in accordance with the verification and documentation procedures established under the applicable program rules. A client must be coded to a single homeless and at risk of homelessness status response category. In addition, in cases where an individual or family meets the definition of homeless under Categories 1 or 2 or meets the at risk definition AND is fleeing domestic violence, they should only be coded to Category 1, 2 or At Risk. Category 4 should only be used when the household does NOT meet any other category but is homeless because of domestic violence.

Data Element Fields: 4.1 Housing Status

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homeless and At-Risk of Homelessness Status</td>
<td>Category 1 – Homeless&lt;br&gt;Category 2 – At imminent risk of losing housing&lt;br&gt;Category 3 – Homeless only under other federal statues&lt;br&gt;Category 4 – Fleeing domestic violence&lt;br&gt;At-risk of homelessness&lt;br&gt;Stably housed&lt;br&gt;Client doesn’t know&lt;br&gt;Client refused</td>
</tr>
</tbody>
</table>

Response Category Descriptions:

- **“Category 1 – Homeless”**

  An individual or family who lacks a fixed, regular, and adequate nighttime residence, meaning:
  (i) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground; **OR**
  (ii) An individual or family living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low income individuals); **OR**
  (iii) An individual who is exiting an institution where he or she resided for 90 days or less and who resided in an emergency shelter or place not meant for human habitation immediately before entering that institution.

- **“Category 2 – At imminent risk of losing housing”**

  Housing Loss in 14 Days: An individual or family who will imminently lose their primary nighttime residence\(^1\) provided that:
  (i) The primary nighttime residence will be lost within 14 days of the date of application for homeless assistance; **AND**
  (ii) No subsequent residence has been identified; **AND**

---

\(^1\) A primary nighttime residence may include housing an individual or family owns, rents, or lives in without paying rent, are sharing with others, and rooms in hotels or motels not paid for by federal, state, or local government programs for low-income individuals or by charitable organizations.
(iii) The individual or family lacks the resources or support networks, e.g., family, friends, faith-based or other social networks needed to obtain other permanent housing.

- “Category 3 – Homeless only under other federal statutes”

Unaccompanied youth under 25 years of age, or families with children and youth, who do not otherwise qualify as homeless under this definition, but who:

(ii) Have not had a lease, ownership interest, or occupancy agreement in permanent housing at any time during the 60 days immediately preceding the date of application for homeless assistance; AND

(iii) Have experienced persistent instability as measured by two moves or more during the 60-day period immediately preceding the date of applying for homeless assistance; AND

(iv) Can be expected to continue in such status for an extended period of time because of chronic disabilities, chronic physical health or mental health conditions, substance addiction, histories of domestic violence or childhood abuse (including neglect), the presence of a child or youth with a disability, or two or more barriers to employment, which include the lack of a high school degree of General Education Development (GED), illiteracy, low English proficiency, a history of incarceration or detention for criminal activity, and a history of unstable employment.

- “Category 4 – Fleeing domestic violence”

Category 4 should only be used when the household does NOT meet any other category but is homeless solely because they are fleeing domestic violence. Category 4 includes any individual or family who:

(i) Is fleeing, or is attempting to flee, domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member, including a child, that has either taken place within the individual’s or family’s primary nighttime residence or has made the individual or family afraid to return to their primary nighttime residence; AND

(ii) Has no other residence; AND

(iii) Lacks the resources or support networks, e.g., family, friends, faith based or other social networks, to obtain other permanent housing.

- “At-Risk of Homelessness”

At project entry, this category is only a valid response for clients being served by Homelessness Prevention or Coordinated Assessment projects. This category includes:

(1) An individual or family who:

   (i) Has an annual income below 30 percent of median family income for the area, as determined by HUD; AND
(ii) Does not have sufficient resources or support networks, e.g., family, friends, faith-based or other social networks, immediately available to prevent them from moving to an emergency shelter or another place described in Homeless Category 1 above; **AND**

(iii) Meets one of the following conditions:

(A) Has moved because of economic reasons two or more times during the 60 days immediately preceding the application for homelessness prevention assistance;
(B) Is living in the home of another because of economic hardship;
(C) Has been notified in writing that their right to occupy their current housing or living situation will be terminated within 21 days after the date of application for assistance;
(D) Lives in a hotel or motel and the cost of the hotel or motel stay is not paid by charitable organizations or by Federal, State, or local government programs for low-income individuals;
(E) Lives in a single-room occupancy or efficiency apartment unit in which there reside more than two persons or lives in a larger housing unit in which there reside more than 1.5 persons reside per room, as defined by the U.S. Census Bureau;
(F) Is exiting a publicly funded institution, or system of care (such as a health-care facility, a mental health facility, foster care or other youth facility, or correction program or institution); or
(G) Otherwise lives in housing that has characteristics associated with instability and an increased risk of homelessness, as identified in the recipient’s approved consolidated plan (for ESG projects) or the jurisdiction’s approved consolidated plan (for non-ESG projects);

**OR**

(2) A child or youth who does not qualify as “homeless” under the categories described above, but qualifies as “homeless” under section 387(3) of the Runaway and Homeless Youth Act (42 U.S.C. 5732a(3)), section 637(11) of the Head Start Act (42 U.S.C. 9832(11)), section 41403(6) of the Violence Against Women Act of 1994 (42 U.S.C. 14043e–2(6)), section 330(h)(5)(A) of the Public Health Service Act (42 U.S.C. 254b(h)(5)(A)), section 3(m) of the Food and Nutrition Act of 2008 (7 U.S.C. 2012(m)), or section 17(b)(15) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(b)(15)); **OR**

(3) A child or youth who does not qualify as “homeless” under the categories described above, but qualifies as “homeless” under section 725(2) of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a(2)), and the parent(s) or guardian(s) of that child or youth if living them.

- “Stably Housed”

An individual or family who is not otherwise experiencing homelessness or at risk of homelessness according to the categories above.

**Special Considerations:** If the project collecting the data houses homeless and non-homeless persons in the same project AND uses HMIS for their Point-in-Time count for this project then data collection is required for all persons, not just the Head of Household and Adults.

**Changes from 2014 - Version 2 Data Standards:** None.

4.2 **Income and Sources**

**Rationale:** Income and sources of income are important for determining service needs of people at the time of project entry, determining whether they are accessing all income sources for which they are
eligible, describing the characteristics of the population experiencing homelessness, and allow analysis of changes in the composition of income between entry and exit from the project and annual changes prior to project exit. Increase in income is a key performance measure of most federal partner programs.

**Collection Point(s):** At project entry, annual assessment, and project exit. Update as income and/or sources change.

**Subjects:** Head of household and adults.

**Federal Partner Requiring Collection:** HUD, HHS, VA [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data on Income and Sources collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collected at project entry and exit are to be dated the same date as the date of project entry and the date of project exit.

An annual assessment is required for all persons residing in the project one year or more. Income and sources must be recorded in the HMIS as an Annual Assessment even if there is no change in either the income or sources.

When a client has income, but does not know the exact amount, a “Yes” response should be recorded for both the overall income question and the specific source, and the income amount should be estimated.

Income received by or on behalf of a minor child should be recorded as part of household income under the Head of Household, unless the federal funder in the HMIS Program Specific Manual instructs otherwise.

Income should be recorded at the client-level for heads of household and adult household members. Projects may choose to collect this information for all household members including minor children, as long as this does not interfere with accurate reporting per funder requirements. Projects collecting data through client interviews should ask clients whether they receive income from each of the sources listed rather than asking them to state the sources of income they receive.

Updates are required for persons aging into adulthood.

Income data should be recorded only for sources of income that are current as of the information date (i.e. have not been specifically terminated). As an example, if a client’s employment has been terminated and the client has not yet secured additional employment, the response for *Earned income* would be “No.” As a further example, if a client’s most recent paycheck was 2 weeks ago from a job in which the client was working full time for $15.00/hour, but the client is currently working 20 hours per week for $12.00 an hour, record the income from the job the client has at the time data are collected (i.e. 20 hours at $12.00 an hour).

4.2 Income and Source are intended to identify regular, recurrent earned income and cash benefits. Services and/or gifts such as phone cards and vouchers that are provided by a project to clients during enrollment are fundamentally different and are not considered income.

Income data may be entered in HMIS consistent with guidelines for calculating household income provided by a project’s funder, if such guidelines exist. For example, for eligibility purposes, both CoC and ESG-funded projects are instructed to exclude income from the employment of a minor child from calculations of household income. The same is true for SSVF. In the absence of income calculation guidelines provided by a funder, as a general rule, any income associated with a minor used for household
expenses and support should be included in the head of households Income and Sources data. Where the income is not relevant for household expenses, it could reasonably be excluded from entry.

Income received for a minor (e.g. SSI) should be recorded as part of the household income under the Head of Household.

Student financial aid is not to be considered income unless the financial aid includes a cash stipend.

Recording income in an HMIS is not the same as performing an income evaluation for purposes of project eligibility determination or a rent calculation for the purpose of determining rental subsidy (24 CFR 5.609 and 24 CFR 5.611(a). Data recorded in HMIS also does not replace required income verification documentation that may be required by a funder.

Lump sum amounts received by a family, such as inheritances, insurance settlements, or proceeds from sale of property, or back pay from Social Security are considered assets, not income and are not recorded in HMIS.

</table>

**Response Category Descriptions:**

- **Information Date:** The date of project entry or exit, the date the annual assessment was completed or the date updated information was collected.

- **Income from any Source, specific Sources, and Amounts:** If the response to Income from any Source is “No” then no further data collection is required. If the response is “Yes” then record (1) whether or not the client receives income from each of the listed sources, (2) the amount of income received from each source on a monthly basis and (3) the client’s total monthly income (rounded to the nearest U.S. dollar) based on income currently being received by the client. The “Client doesn’t know” and “Client refused” responses should only be used when clients do not know or refuse to answer whether they have any income.

- **VA service-connected disability compensation** refers to a benefit paid to veterans with a service-connected disability.

- **VA non-service-connected disability pension** refers to a benefit paid to wartime veterans who have limited or no income and who are ages 65 or older or, if under 65, who are permanently and totally disabled.

- Military retirement pay should be reported under Pension or retirement income from a former job.

- Social Security Survivor benefits are Retirement Income from Social Security.

**Special Considerations:** None

**Changes from 2014 - Version 2 Data Standards:** Minor clarifications to data collection instruction and response category description.
4.3 Non-Cash Benefits

**Rationale:** Non-cash benefits are important to determine whether clients are accessing all mainstream program benefits for which they may be eligible and to develop a more complete picture of their economic circumstances.

**Collection Point(s):** At project entry, annual assessment, and project exit. Update as Non-cash benefits change.

**Subjects:** Head of household and adults.

**Federal Partner Requiring Collection:** HUD, HHS, VA [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data on Non-Cash Benefits collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit.

An annual assessment is required for all persons residing in the project one year or more. Non-Cash Benefits must be recorded in the HMIS as an Annual Assessment even if there is no change in the benefits.

Record whether or not the client is receiving each of the listed benefits. A “Yes” response should be recorded only for current benefits. As an example, if a client received food stamps on the first of the month and expects to receive food stamps again on the first of the next month, record “Yes” for *Supplemental Nutritional Assistance Program (SNAP)*. If a client received food stamps on the first of the month but is not eligible to receive food stamps on the first of next month, then the client would not be considered to be currently receiving food stamps and “No” should be recorded for *Supplemental Nutritional Assistance Program (SNAP)*. Clients may identify multiple sources of non-cash benefits. Benefits received by a minor child should be assigned to the head of household. In the event that a minor child enters or leaves the household and the non-cash benefits received by the household change as a result, an update to the head of household’s record should be entered to reflect that change.

Updates are required for persons aging into adulthood.

To reduce data collection and reporting burden, if a client reports receiving no non-cash benefit from any source, no additional data collection is required. If *Non-cash benefit from any source* is “Yes,” however, project staff should ask clients to respond with a “Yes” or “No” for each of the listed benefits.

*Non-cash benefits received for the household (such as SNAP/Food Stamps) should be recorded under the non-cash benefits of the head of household.*

**Data Element Fields: 4.3 Non-Cash Benefits**

**Response Category Descriptions:**

- *Information Date*: The date of project entry or exit, the date the annual assessment was completed or the date updated information was collected.

- *Non-Cash Benefit from Any Source and specific Sources*: If the response to *Non-Cash Benefit from Any Source* is “No” then no further data collection is required. If the response is “Yes” then record which source(s) is being received. The “Client doesn’t know” and “Client refused” responses should only be used when clients do not know or refuse to answer whether they have non-cash benefits.

**Special Considerations:** None

- *Changes from 2014 - Version 2 Data Standards*: Minor clarification to data collection instruction.

**4.4 Health Insurance**

**Rationale:** Health insurance information is important to determine whether clients currently have health insurance coverage and are accessing all mainstream project medical assistance benefits for which they may be eligible, and to ascertain a more complete picture of their economic circumstances.

**Collection Point(s):** At project entry, annual assessment, and project exit. Update as health insurance changes.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD, HHS, VA [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data on Health Insurance collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit.

An annual assessment is required for all persons residing in the project one year or more. Health Insurance must be recorded in the HMIS as an Annual Assessment even if there is no change. Updates are required for persons aging into adulthood.

</table>

Response Category Descriptions:

- **Information Date**: The date of project entry or exit, the date the annual assessment was completed or the date updated information was collected.

- **Covered by Health Insurance** and specific Sources: If the response to **Covered by Health Insurance** is “No” then no further data collection is required. If the response is “Yes” then record whether or not the client is covered by each of the listed insurance types. If required by a funder, enter the reason why such insurance is not being received for each health insurance source. To reduce data collection and reporting burden, if a client reports having no health insurance coverage, no additional data collection is required unless required by a specific funder.

- Health Insurance of types other than those listed are to be collected as follows:
  - Indian Health Insurance was omitted in error – please record as Indian Health Insurance under Medicaid until the Data Standards are fully updated in the future.
  - Insurance accessed through the federal or a state Health Exchange (e.g. healthcare.gov), except for Medicaid should be recorded as Private Pay Health Insurance, even if a subsidy covering most of the cost of insurance was provided.
  - If the Health Exchange provided access to Medicaid and Medicaid was received then enter the health care as Medicaid.
• Record TRICARE – available to veterans based on military service –as “Employer-Provided Health Care.

• Medicaid is a partnership between federal and state funds. It should always be listed as Medicaid not State Health Insurance.

• Indigent care received by a medical provider or hospital to cover a health care cost is not insurance and should not be recorded in HMIS.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: Minor clarification to response category descriptions.

4.5 Physical Disability

Rationale: To count the number of physically disabled persons served, determine eligibility for disability benefits, and assess the need for services.

Collection Point(s): At project entry and project exit. Update if information changes anytime during project stay.

Subjects: All clients.

Federal Partner Requiring Collection: HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

Data Collection Instructions: Data on Physical Disability collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate fields, determine (1) if the client has a physical disability, (2) if the disability is expected to be of long-continued and indefinite duration and impairs the client’s ability to live independently, (3) if there is documentation of the disability on file, and (4) if the client is currently receiving services or treatment for this disability or received services or treatment prior to exiting the project.

#### Response Category Descriptions:

- For the purposes of these Data Standards, a physical disability means a physical impairment.
- *Information date* is the date of project entry, project exit, or the date updated information was collected.
- *Expected to be of long-continued and indefinite duration and substantially impairs ability to live independently* means (1) expected to be of long, continued and indefinite duration, (2) substantially impedes an individual’s ability to live independently, and (3) of such a nature that such ability could be improved by more suitable housing conditions.
- *Documentation of the disability and severity on file* requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

#### Special Considerations:

Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

#### Changes from 2014 - Version 2 Data Standards:

None.

#### 4.6 Developmental Disability

**Rationale:** To count the number of developmentally disabled persons served, determine eligibility for disability benefits, and assess their need for services.

**Collection Point(s):** At project entry and project exit. Update if information changes anytime during project stay.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data collected on Developmental Disability at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate fields, determine (1) if the client has a physical disability, (2) if the disability is expected to substantially impair the client’s ability to live independently, (3) if there is documentation of the disability on file, and (4) if the client is currently receiving services or treatment for this disability or received services or treatment prior to exiting the project.

</table>

**Response Category Descriptions:**

- For the purposes of these Data Standards, a developmental disability means a severe, chronic disability that is attributed to a mental or physical impairment (or combination of physical and mental impairments) that occurs before 22 years of age and limits the capacity for independent living and economic self-sufficiency.

- **Information date** is the date of project entry, project exit, or the date updated information was collected.

- **Expected to substantially impair ability to live independently** means (1) substantially impedes an individual’s ability to live independently and (2) of such a nature that such ability could be improved by more suitable housing conditions.

- **Documentation of the disability and severity on file** requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

**Special Considerations:** Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

**Changes from 2014 - Version 2 Data Standards:** None
4.7 Chronic Health Condition

Rationale: To count the number of persons served with severe health conditions and assess their need for healthcare and other medical services.

Collection Point(s): At project entry and project exit. Update if information changes anytime during project stay.

Subjects: All clients.

Federal Partner Requiring Collection: HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

Data Collection Instructions: Data on Chronic Health Condition collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate fields, determine (1) if the client has a chronic health condition, (2) if the condition is expected to be of long-continued and indefinite duration and impairs the client’s ability to live independently, (3) if there is documentation of the condition on file, and (4) if the client is currently receiving services or treatment for this condition or received services or treatment prior to exiting the project.

</tr>
</tbody>
</table>

Response Category Descriptions:

- For the purposes of these Data Standards, a chronic health condition means a diagnosed condition that is more than 3 months in duration and is either not curable or has residual effects that limit daily living and require adaptation in function or special assistance. Examples of chronic health conditions include, but are not limited to: heart disease (including coronary heart disease, angina,
heart attack and any other kind of heart condition or disease); severe asthma; diabetes; arthritis-related conditions (including arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia); adult onset cognitive impairments (including traumatic brain injury, post-traumatic distress syndrome, dementia, and other cognitive related conditions); severe headache/migraine; cancer; chronic bronchitis; liver condition; stroke; or emphysema.

- **Information date** is the date of project entry, project exit, or the date updated information was collected.

- **Expected to be of long-continued and indefinite duration and substantially impairs ability to live independently** means (1) expected to be of long, continued and indefinite duration, (2) substantially impedes an individual’s ability to live independently, and (3) of such a nature that such ability could be improved by more suitable housing conditions.

- **Documentation of the disability and severity on file** requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

**Special Considerations:** Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

**Changes from 2014 - Version 2 Data Standards:** None

### 4.8 HIV/AIDS

**Rationale:** To count the number of persons served who have been diagnosed with AIDS or have tested positive for HIV and assess their need for services.

**Collection Point(s):** At project entry and project exit. Update if information changes anytime during project stay.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data on HIV/AIDS collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate fields, determine (1) if the client has HIV/AIDS, (2) if the disability is expected to substantially impair the client’s ability to live independently, (3) if there is documentation of the disability on file, and (4) if the client is currently receiving services or treatment for this condition or received services or treatment prior to exiting the project.
**Data Element Fields: 4.8 HIV/AIDS**

**Response Category Descriptions:**

- *Information date* is the date of project entry, project exit, or the date updated information was collected.

- *Expected to substantially impair ability to live independently* means (1) substantially impedes an individual’s ability to live independently and (2) of such a nature that such ability could be improved by more suitable housing conditions.

- *Documentation of the disability and severity on file* requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

**Special Considerations:** Such information is covered by confidentiality requirements. As in other areas involving sensitive or protected client information, information should be recorded only when a project has data confidentiality protections that conform to the standards specified in the HMIS Final Rule, to be published. These protections include agency policies and procedures and staff training to ensure that HIV-related information cannot be accessed by anyone without the proper authorization.

Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

*Changes from 2014 - Version 2 Data Standards:* None
4.9 Mental Health Problem

**Rationale:** To count the number of persons with mental health problems served and to assess the need for treatment.

**Collection Point(s):** At project entry and project exit. Update if information changes anytime during project stay.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Data on Mental Health Problem collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate data fields, determine: (1) if the client has a mental health problem, (2) if the problem is expected to be of long-continued and indefinite duration and substantially impedes a client’s ability to live independently, (3) if there is documentation of the problem on file, and (4) if the client is currently receiving services or treatment for the problem or received services or treatment prior to exiting the project.

If required by a funder, identify how the mental health problem was confirmed, whether the mental health problem qualifies as a serious mental illness (SMI) and, if so, how SMI was confirmed.

**Data Element Fields: 4.9 Mental Health Problem**

</tbody>
</table>

### Response Category Descriptions:

- **Information date** is the date of project entry, project exit, or the date updated information was collected.
- **Mental Health Problem** select “Yes” if the mental health problem was a cause of homelessness, a significant issue for the individual, or is of a serious nature. A mental health problem may range from situational depression to serious mental illnesses. The dependent fields are designed to gauge the severity of the mental health problem.
- **Expected to be of long-continued and indefinite duration and substantially impairs ability to live independently** means (1) expected to be of long, continued and indefinite duration, (2) substantially impedes an individual’s ability to live independently, and (3) of such a nature that such ability could be improved by more suitable housing conditions.
- **Documentation of the disability and severity on file** requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

### Special Considerations:

Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

### Changes from 2014 - Version 2 Data Standards:

None

### 4.10 Substance Abuse

**Rationale:** To count the number of persons served with substance abuse problems and to assess the need for treatment.

**Collection Point(s):** At project entry and project exit. Update if information changes anytime during project stay.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]
Data Collection Instructions: Data on Substance Abuse collected at project entry and project exit are to reflect the information as of the date of entry and exit. Data collections for project entry and exit information are to be dated the same date as the date of project entry and the date of project exit. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate data fields, determine: (1) if the client has an alcohol or drug abuse problem or both, (2) if the problem is expected to be of long-continued and indefinite duration and substantially impedes a client’s ability to live independently, (3) if there is documentation of the problem on file, and (4) if the client is currently receiving services or treatment for the condition or received services or treatment prior to exiting the project. If required by a funder, identify how the substance abuse problem was confirmed.

Data Element Fields: 4.10 Substance Abuse

</tbody>
</table>

Response Category Descriptions:

- Information date is the date of project entry, project exit, or the date updated information was collected.
• Expected to be of long-continued and indefinite duration and substantially impairs ability to live independently means: (1) expected to be of long, continued and indefinite duration, (2) substantially impedes an individual’s ability to live independently, and (3) of such a nature that such ability could be improved by more suitable housing conditions.

• Documentation of the disability and severity on file requirements vary by federal funding program so specific guidance around acceptable documentation will be provided in the Program Specific Manuals.

Special Considerations: Projects should be especially sensitive to the collection of disability information from clients under the age of 18. In households with children accompanied by an adult, children’s disabilities should be determined based on an interview with the adult in the household.

Changes from 2014 - Version 2 Data Standards: None

4.11 Domestic Violence

Rationale: Ascertaining whether a person is a victim of domestic violence is necessary to provide the person with the appropriate services to prevent further abuse and to treat the physical and psychological injuries from prior abuse. Also, ascertaining that a person may be experiencing domestic violence may be important for the safety of project staff and other clients. At the aggregate level, knowing the size of the population experiencing homelessness that has experienced domestic violence is critical for determining the resources needed to address the problem in this population.

Collection Point(s): At project entry. Update if information changes anytime during project stay.

Subjects: Head of household and adults.

Federal Partner Requiring Collection: HUD [refer to Federal Partner Program Specific pages throughout this document.]

Data Collection Instructions: Data on Domestic Violence collected at project entry are to reflect the information as of the date of entry. Data collected at project entry are to be dated the same date as the date of project entry. Data should be reviewed and updated as necessary any time the information has been known to change.

In separate fields, determine (1) if the client has ever been a victim of domestic violence, and (2), if so, when the client’s most recent experience of domestic violence occurred.

Data Element Fields: 4.11 Domestic Violence

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>

<td>One year ago or more</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>
**4.12 Contact**

*Rationale:* To record and count the number of contacts with homeless persons by street outreach and other service projects and to provide information on the number of contacts required to engage the client.

*Collection Point(s):* At project entry, project exit and each contact between entry and exit.

*Subjects:* Head of household and adults.

*Federal Partner Requiring Collection:* HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

*Data Collection Instructions:* Record the date and location of each contact with a client. To record a contact in HMIS requires that a client record be established in the HMIS. Refer to guidance in HMIS Program Manuals (PATH, ESG, or RHY) for more details. This data element is required for all Street Outreach Projects.

*Data Element Fields: 4.12 Contact*

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date of Contact</td>
<td>(date)</td>
</tr>
<tr>
<td>Location of Contact</td>
<td>Place not meant for habitation</td>
</tr>
<tr>
<td></td>
<td>Service setting, non-residential</td>
</tr>
<tr>
<td></td>
<td>Service setting, residential</td>
</tr>
</tbody>
</table>
Response Category Descriptions: A contact is defined as an interaction between a worker and a client. Contacts may range from simple a verbal conversation between the street outreach worker and the client about the client’s well-being or needs or may be a referral to service.

- **Place not meant for habitation** could include a vehicle, abandoned building, bus/train/subway station/airport or anywhere outside that is not a Homeless Connect-type event.
- **Service setting, non-residential** could include a Homeless Connect-type event, drop in center, day services center, soup kitchen, etc.
- **Service setting, residential** could include emergency, transitional or permanent housing; treatment facility, including health, mental health, or substance abuse clinic or hospital; jail, prison, or juvenile detention facility; family or friend’s room, apartment, condo, or house; foster care or group home.

**Special Considerations:** None

**Changes from 2014 - Version 2 Data Standards:** Minor clarification to data collection instruction.

### 4.13 Date of Engagement

**Rationale:** To count the number of homeless persons engaged by street outreach projects and night-by-night shelters.

**Collection Point(s):** Update.

**Subjects:** Head of household and adults.

**Federal Partner Requiring Collection:** HUD, HHS [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Record the date a client became engaged. Only one date of engagement is allowed between project entry and project exit. Should the client return after project exit and have a new project entry a new date of engagement is to be established.

**Data Element Fields:** **4.13 Date of Engagement**

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>Date of Engagement</td>
<td>(date)</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** Date of engagement is defined as the date on which an interactive client relationship results in a deliberate client assessment or beginning of a case plan. The date of engagement should be entered into HMIS at the point that the client has become engaged. It may be on or after the project entry date and prior to project exit. If the client exits without becoming engaged the engagement date should be left blank.

For PATH projects only, the date of engagement must occur on or before the date of enrollment (PATH Status 4.20).

**Special Considerations:** None

**Changes from 2014 - Version 2 Data Standards:** Minor clarification to data collection instruction.
4.14 Services Provided

Services are required to be collected in an HMIS by specific Federal Partners. Each Federal Partner has its own specific requirements for what information they want collected and when to collect that information. Refer to the Federal Partner section of this manual for details regarding the specific requirements for Services Provided.

4.14A Services Provided: PATH Funded
4.14B Services Provided: RHY
4.14C Services Provided: HOPWA
4.14D Services Provided: SSVF
4.14E Services Provided: Bed-night Date

4.15 Financial Assistance Provided

Financial Assistance information is required to be collected in an HMIS by specific Federal Partners. Each Federal Partner has its own specific requirements for what information they want collected and when to collect that information. Refer to the Federal Partner section of this manual for details regarding the specific requirements for Financial Assistance Provided.

4.15A Financial Assistance: HOPWA
4.15B Financial Assistance: SSVF

Changes from 2014 - Version 2 Data Standards: None.

4.16 Referrals Provided

Referrals Provided information is required to be collected in an HMIS by specific Federal Partners. Each Federal Partner has its own specific requirements what information they want collected and when to collect that information. Refer to the Federal Partner section of this manual for details regarding the specific requirements for Services Provided.

4.16A Referrals Provided: PATH
4.16B Referrals Provided: RHY

Changes from 2014 - Version 2 Data Standards: None.

4.17 Residential Move-In Date

Rationale: To differentiate between clients who are awaiting placement in housing and those who have moved into permanent housing for Rapid Re-Housing projects. This data is critical to point-in-time and housing inventory counts as it differentiates a client from a homeless status (in shelter) to a permanent housing status (in RRH housing unit).

Collection Point(s): At project entry. Edit as necessary to reflect changes during the course of enrollment.

Subjects: All clients.

Federal Partner Requiring Collection: HUD, VA [refer to Federal Partner Program Specific pages throughout this document.]

Data Collection Instructions: Indicate the date on which the client achieved placement in permanent housing. In the event that the client returns to homelessness prior to the project exit date, edit (i.e., change the response to In Permanent Housing to “No”) to reflect the change.
Residential Move-in Date is the date of the first night the client stays (sleeps) in a permanent housing unit (a fixed, regular, and adequate nighttime residence intended to be permanent) while he or she is enrolled in an RRH project (i.e. any time after project entry as defined for RRH in data element 3.10 Project Entry Date and before project exit).

No Residential Move-in Date would be recorded if the client only received housing assistance, placement, or other supportive services through RRH prior to housing and then never moved into housing.

Data Element Fields: 4.17 Residential Move-In Date

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information Date</td>
<td>(date)</td>
</tr>
<tr>
<td>In Permanent Housing</td>
<td>No</td>
</tr>
<tr>
<td>(if yes) Date of Move-In</td>
<td>(date)</td>
</tr>
</tbody>
</table>

Response Category Descriptions: All RRH clients at project entry must have recorded whether the client is residing in housing through the Rapid Re-Housing project by indicating “Yes” or “No”. If “No” is recorded at project entry for In Permanent Housing a subsequent edit must be made to specify the date the client moves into housing. For all clients who have answered “Yes” for In Permanent Housing, the date the client physically moved into housing must be entered.

Special Considerations: None

Changes from 2014 - Version 2 Data Standards: None.

4.18 Housing Assessment Disposition

Rationale: To track client disposition following a brief assessment of critical housing needs. This data element may be used as part of a coordinated assessment system. The disposition response categories represent the different types of continuum projects or other community assistance to which a client may be referred upon presenting to a coordinated assessment project or related point of contact with a request for assistance to address a housing crisis.

Collection Point(s): At project exit (or update as required based on model).

Subjects: Head of household.

Federal Partner Requiring Collection: HUD [refer to Federal Partner Program Specific pages throughout this document.]

Data Collection Instructions: Indicate the appropriate disposition of the client following a housing crisis assessment once at or before project exit.

Data Element Fields: 4.18 Housing Assessment Disposition

---

4.19 **Housing Assessment at Exit**

**Rationale:** To determine whether clients exiting prevention projects have remained stably housed.

**Collection Point(s):** At project exit.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD [refer to Federal Partner Program Specific pages throughout this document.]

**Data Collection Instructions:** Determine the response value that best describes the client’s housing circumstances from project entry to project exit.

**Data Element Fields:** 4.19 Housing Assessment at Exit

<table>
<thead>

*Response Category Descriptions:* Services provided are those that PATH has funded in a local community and with which the client has been connected. Descriptions of PATH funded services may be found at [http://pathprogram.samhsa.gov/](http://pathprogram.samhsa.gov/).

*Special Considerations:* PATH only records services that are PATH funded. If providers want to collect other services provided then a separate element must be created to distinguish PATH funded services from non-PATH funded services.

*Changes from 2014 - Version 2 Data Standards:* None.

4.16A Referrals Provided: PATH

*Rationale:* To record the number of referrals provided to clients during program participation.

*Collection Point(s):* Update as required – each time referrals are provided.

*Subjects:* Head of household and adults.

*Federal Partner Requiring Collection:* HHS: PATH.
Data Collection Instructions: The referrals to be recorded in HMIS are those which the project made for the benefit of the client being referred. In separate fields record the date of referral, the type of referral, and outcome for each referral.

Data Element Fields: **4.16A Referrals Provided: PATH**

<table>
<thead>
<tr>

</tbody>
</table>

(if any referral made – for each) **Select Outcome for each**

|                                          | Attained                  |
|                                          | Not attained              |
|                                          | Unknown                   |

Response Category Descriptions:

- A PATH referral is recorded each time a referral is made. If a worker makes three referrals for the same service between project entry and exit then all three referrals should be recorded.
- “Attained” means the client was connected and received the service
- “Not attained” means the client was referred to, but may not have ever been connected with, the service or did not actually receive the service
- “Unknown” means the status of the client’s connection or receipt of service is unknown to the provider entering the data.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None.

4.20 PATH Status

Rationale: To determine the enrollment status for each PATH client in order to count the number of enrolled clients.

Collection Point(s): Update. Collect once at or before exit when enrollment status is determined.

Subjects: Head of household and adults

Federal Partner Requiring Collection: HHS: PATH.

Data Collection Instructions: A PATH enrollment occurs at the point when a client has formally consented to participate in services provided by the PATH project. PATH projects must report on the number of clients enrolled during each operating year. The date of enrollment may be on or after the project entry date and on or after the date of engagement.

Data Element Fields: **4.20 PATH Status**
### Field Names | Data Types/Response Categories
--- | ---
**Date of Status Determination** | (date)
**Client Became Enrolled in PATH** | No
 | Yes
**Reason Not Enrolled** | Client was found ineligible for PATH
 | Client was not enrolled for other reason(s)

**Response Category Descriptions:** A worker may enroll a client in PATH if the following has occurred:

1. The worker determined the client to be PATH eligible (homeless or at imminent risk of homelessness and seriously mentally ill (SMI)).
2. The worker recorded at least one contact with the client which could be the contact at project entry. [4.12 Contact]
3. The worker has established a date of engagement with the client which is on or after the date of project entry. [4.13 Date of Engagement]
4. The worker has opened an individual file on the client and the client has agreed to PATH enrollment.

If the client’s case is closed and the client did not enroll in the PATH program, indicate the reason for non-enrollment as either “Client was found ineligible for PATH” (not homeless or at imminent risk of homelessness and/or not seriously mentally ill) or “Client was not enrolled for any other reason(s)” (including but not limited to the client declined enrollment, the client disappeared, etc.).

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** None.

---

### 4.21 Connection with SOAR

**Rationale:** To identify persons who are connected to the SOAR (SSI/SSDI Outreach, Access and Recovery) program.

**Collection Point(s):** At project exit.

**Subjects:** Head of Household and adults

**Federal Partner Requiring Collection:** HHS: PATH.

**Data Collection Instructions:** Choose one response category to indicate whether the client has been connected to the SOAR program.

**Data Element Fields:** 4.21 Connection with SOAR

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Connection with SOAR</strong></td>
<td>No</td>
</tr>
<tr>
<td></td>
<td>Yes</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** This element will not be required for collection by PATH until OMB has approved a new PATH report which is expected in 2015.

**Changes from 2014 - Version 2 Data Standards:** None.
HHS: RHY Program Specific

Runaway and Homeless Youth (RHY) is a program of the U.S. Department of Health and Human Services (HHS) - Administered by the Family and Youth Service Bureau (FYSB), a component of the Administration for Children and Families (ACF)

For RHY Program information go to: http://www.acf.hhs.gov/programs/fysb/programs/runaway-homeless-youth

The elements shown are only those in which least one RHY program component is required to collect information.

X = data collection is required

4.14B Services Provided: RHY

Rationale: To determine the services provided to youth during project participation.

Collection Point(s): Update as required – each time services are provided.

Subjects: Head of Household, Adults and Unaccompanied Youth.

Federal Partner Requiring Collection: HHS: RHY

Data Collection Instructions: Services should be recorded for the youth to whom they were provided; a service that benefits the whole household in TLP or MGH may be recorded solely for the youth head of household. For each service provided, projects should record the service date and service type.

Data Element Fields: 4.14B Services Provided: RHY

Response Category Descriptions:

- Components of the RHY program (BCP, TLP, etc.) are only required to collect those services indicated with an “X” above.
- Services provided are those that are provided either by the grant organization or elsewhere in the local community and with which the client has been connected.
• “Basic support services”: Includes provision of food, clothing, shelter, transportation, etc.
• “Community service/service learning (CSL)”: Activities that involve youth in helping others or the community.
• “Counseling/therapy”: The provision of guidance, support, and advice designed to address interfamilial problems or help youth decide on a future course of action. (Examples of counseling/therapy include crisis intervention, individual youth counseling, home-based services, group counseling, outdoor adventure/challenge activities, expressive/art therapy, and meditation.)
• “Dental care”: Provision of dental services by a licensed dentist or other oral health specialist.
• “Education”: Includes learning disability assessment, tutoring, GED preparation, local school enrollment, vocational education, etc.
• “Employment and training services”: Includes services related to helping young people obtain and retain employment, such as assessment, coaching, filling out applications, interviewing, practicing and conducting job searches, referrals, and job maintenance skills.
• “Criminal justice/legal services”: Legal services or guidance provided through an attorney or an attorney-supervised paralegal.
• “Life skills training”: Includes formal and informal coaching and training in communications skills, health promotion, conflict/anger management, assertiveness, goal setting, budgeting, life planning, nutrition, hygiene, etc.
• “Parenting education for parent of youth” and “Parenting education for youth with children”: Services designed to build improved parenting skills.
• “Peer (youth) counseling”: Counseling provided by trained youth volunteers or youth staff to the young person.
• “Post-natal care”: Service provided to teen parent.
• “Pre-natal care”: Service provided to a pregnant teen.
• “Health/medical care”: Provision of general health care or surgical services by licensed medical practitioners. May include prenatal testing, STD testing, and other types of health screening.
• “Psychological or psychiatric care”: Provision of assessment or treatment services by a licensed/certified medical mental health professional or professional psychologist.
• “Recreational activities”: Includes sports, arts, and crafts, field trips, nature hikes, etc.
• “Substance abuse assessment and/or treatment”: Comprehensive assessment of an individual’s current or past involvement with alcohol and/or drugs and/or provision of treatment, including screening, aimed at stopping their substance abuse.
• “Substance abuse prevention”: includes activities related to alcohol and drug abuse prevention, such as education, group activities, peer coaching, refusal skills, etc.
• “Support group”: Participation in one or more support groups, such as Alateen, Alcoholics Anonymous, Al-Anon, or a faith-based group.
• “Preventative – overnight interim, respite”: The youth was provided not more than a few nights of interim, provisional accommodations at the BCP shelter (for respite, but not as a full program participant although within the care and supervision of the program.) This experience could be for a “cooling off” period or during transfer to an appropriate permanent living setting. The expectation is that the youth returns to the original household or alternative permanent living situation in the following day or few days.
• “Preventative – formal placement in an alternative setting outside of BCP”: It was determined that the interests of the youth would be served by placement away from the household of residence and not in the BCP shelter. The new living situation should be safe, appropriate and suitable to the needs and development of the youth.
• “Preventative – entry into BCP after preventative services”: The youth was provided more than one night of temporary shelter (full intake at the BCP shelter) after prevention efforts during a crisis intervention period, with anticipation of reunification with the family or in an alternative placement. The youth may have previously received any combination of preventative services.
• “Street Outreach – Health and Hygiene Products Distributed”: Distribution of health and hygiene products such as First Aid or reproductive health products.
• “Street Outreach – Food and Drink Items”: Distribution of food and drink items or packages.
• “Street Outreach – Services Information/Brochures”: Distribution of written materials such as brochures or fliers.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

4.16B Referrals Provided: RHY

Rationale: To record the referrals provided to clients during program participation.

Collection Point(s): Update as required – each time referrals are provided.

Subjects: Head of Household, Adults and Unaccompanied Youth.

Federal Partner Requiring Collection: HHS: RHY

Data Collection Instructions: The referrals to be recorded in HMIS are those which the project made for the benefit of the client being referred. In separate fields record the date of referral and the type of referral.

Data Element Fields: 4.16B Referrals Provided: RHY

</tbody>
</table>

**Response Category Descriptions:** A RHY referral is provided after substantial interaction with the youth or family to promote healthy development or strengthen a youth’s assets. Record all referrals made for the youth in HMIS. A single youth may have multiple referrals of the same type.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

### 4.22 RHY - BCP Status

**Rationale:** To determine the number of homeless persons eligible for FYSB in RHY BCP-funded emergency shelter projects.

**Collection Point(s):** In the course of client assessment for purposes of determining eligibility.

**Subjects:** All clients?

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** The RHY-BCP status occurs at the point which eligibility for FYSB has been determined. The RHY-BCP status date may be on or after the project entry date.

**Data Element Fields:** 4.22 RHY - BCP Status

<table>

<td></td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** Identify as “Yes” as defined by RHY in other guidance.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.
4.23 Sexual Orientation

**Rationale:** To identify the sexual orientation of youth served in RHY programs.

**Collection Point(s):** At project entry.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Choose one response category indicating how the client describes their sexual orientation.

**Data Element Fields:** 4.23 Sexual Orientation

<table>
<thead>
<tr>

<td>Questioning/Unsure</td>
</tr>
<tr>
<td></td>
<td>Client doesn’t know</td>
</tr>
<tr>
<td></td>
<td>Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** Any questions regarding a client’s sexual orientation must be voluntary and clients must be informed prior to responding of the voluntary nature of the question and that their refusal to respond will not result in a denial of services.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

4.24 Last Grade Completed

**Rationale:** To identify the educational attainment of youth served in RHY projects.

**Collection Point(s):** At project entry.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Choose one response category describing the last grade level completed by the client.

**Data Element Fields:** 4.24 Last Grade Completed

<table>
<thead>

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.
4.26 Employment Status

**Rationale:** To assess client’s employment status and need for employment services.

**Collection Point(s):** At project entry and project exit.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Enter the date that the information was collected from the client or to which the information is relevant. For example, if information is collected several days after project entry, it may be entered using an *Information date* that is the same as the entry date as long as the information accurately reflects the client’s income as of the entry date. Select the response category that most accurately reflects the client’s employment status.

**Data Element Fields:** 4.26 Employment Status

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Response Category Descriptions:**

- “Seasonal/sporadic (including day labor)” : Youth is employed occasionally, with periods of unemployment interspersed with employment. This includes summer or holiday-specific employment.
- “Looking for work”: Youth is not employed and is actively looking for work.
- “Unable to work”: Youth is not employed because he or she is unable to work due to a physical disability, a developmental disability, or an illness.
- “Not looking for work”: Youth is not employed and is not looking for employment.

**Special Considerations:** Projects may ask additional information about a person’s employment status, including more detailed information on the type of employment.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.
4.27 General Health Status

*Rationale:* Information on general health status is a first step to identifying what types of health services a client may need. This element permits comparison between homeless youth to other youth their age.

*Collection Point(s):* At project entry and project exit.

*Subjects:* Head of Household, Adults and Unaccompanied Youth.

*Federal Partner Requiring Collection:* HHS: RHY.

*Data Collection Instructions:* Ask the youth to select one of the response options and record the option selected by the youth.

*Data Element Fields: 4.27 General Health Status*

<table>

Response Category Descriptions: None.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

4.30 Pregnancy Status

Rationale: To determine the number of women entering continuum projects while pregnant and to determine eligibility for benefits and need for services.

Collection Point(s): At project entry and update.

Subjects: All Female - Head of Household, Adults and Unaccompanied Youth.

Federal Partner Requiring Collection: HHS: RHY.

Data Collection Instructions: In separate fields, indicate if a client is pregnant and, if so, the due date. If the exact date is unknown, projects are encouraged to record as much of the date as known. Default to
January, the first day of the month, and current year for any part of the due date not known. Communities that already have a policy of entering another approximate day may continue this policy.

**Data Element Fields: 4.30 Pregnancy Status**

4.33  Young Person’s Critical Issues

_Rationale_: To identify specific issues faced by youth in RHY programs.

_Collection Point(s)_: Project Entry

_Subjects_: Head of Household, Adults and Unaccompanied Youth.

_Federal Partner Requiring Collection_: HHS: RHY.

_Data Collection Instructions_: Choose appropriate response categories to identify the young person’s critical issues, as identified by staff and the young person. These categories are for reporting purposes and are therefore general and broad.

_Data Element Fields_: **4.33 Young Person’s Critical Issues**

| Integer response |

Response Category Descriptions: None.

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

4.35A Commercial Sexual Exploitation

Rationale: To assess the extent of sexual exploitation among homeless youth.

Collection Point(s): At project entry.

Subjects: Heads of household, Adults, and unaccompanied youth.

Federal Partner Requiring Collection: HHS: RHY.

Data Collection Instructions: RHY has requested that this element be asked of the youth using the following wording:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>RHY preferred wording</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ever received anything in exchange for sex (e.g. money, food, drugs, shelter)</td>
<td>“Have you ever received anything in exchange for having sexual relations with another person, such as money, food, drugs, or shelter?”</td>
</tr>
<tr>
<td>If yes to 1 - In the last three months</td>
<td>If they say “yes” to the question above then ask “Has it been in the past three months?”</td>
</tr>
<tr>
<td>If yes to 1 - How many times</td>
<td>“How many times have you received something in exchange for having sexual relations with another person, such as money, food, drugs, or shelter?”</td>
</tr>
<tr>

</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** This element revises the wording and structure of 4.35 to comply with OMB requirements. In addition the universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.
4.35B Commercial Labor Exploitation

Rationale: To assess the extent of labor exploitation among homeless youth.

Collection Point(s): At project entry.

Subjects: Heads of household, Adults and Unaccompanied Youth.

Federal Partner Requiring Collection: HHS: RHY.

Data Collection Instructions: RHY is requesting that this element be asked of the youth using the following wording whenever possible:

<table>
<thead>
<tr>
<th>Field Name</th>
<th>RHY preferred wording</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ever afraid to quit/leave work due to threats of violence to yourself, family, or friends</td>
<td>“Have you ever been afraid to leave or quit a work situation due to fears of violence or other threats of harm to yourself, family or friends?”</td>
</tr>
<tr>
<td>Ever promised work where work or payment different than you expected</td>
<td>“Have you ever been promised work where the work or payment ended up being different from what you expected?”</td>
</tr>
<tr>
<td>Felt forced, pressured or tricked into continuing the job</td>
<td>“Did you feel forced, pressured or tricked into continuing this job?”</td>
</tr>
<tr>
<td>In the last 3 months</td>
<td>“Have you had any jobs like these in the last 3 months?”</td>
</tr>
</tbody>
</table>

Changes from 2014 - Version 2 Data Standards: This is a new data element
### 4.36 Transitional, Exit-care, or Aftercare Plans and Actions

**Rationale:** To identify the extent of transitional, exit and aftercare plans and actions which were afforded to RHY clients.

**Collection Point(s):** At project exit.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Record a response for all plans and actions listed.

**Data Element Fields:** 4.36 Transitional, Exit-care, or Aftercare Plans and Actions

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>A written transitional, aftercare, or follow-up plan or agreement</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>Advice about and/or referral to appropriate mainstream assistance programs</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>Placement in appropriate, permanent, stable housing (not a shelter)</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>Due to unavoidable circumstances or scarcities of appropriate housing, the youth must be transported or accompanied to a temporary shelter</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>Exit counseling</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>A course of further follow-up treatment or services</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>A follow-up meeting or series of staff/youth meetings or contacts has been scheduled</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>A &quot;package&quot; of such things as maps, information about local shelters and resources</td>
<td>No, Yes, Client refused</td>
</tr>
<tr>
<td>Other</td>
<td>No, Yes, Client refused</td>
</tr>
</tbody>
</table>

**Response Category Descriptions:**
- **A written transitional, aftercare or follow-up plan or agreement:** Plan or agreement has been worked out with the youth, understood, and agreed to.
• **Advice about and/or referral to appropriate mainstream assistance programs:** Advice or referral has been provided.

• **Placement in appropriate, permanent, stable housing (not a shelter):** This goes beyond mere referral to mainstream housing assistance and assumes the youth is eligible for and guaranteed an immediately available or reserved slot with a waiting period for reserved accommodations of no longer than 2 weeks and suitable interim arrangements.

• **Due to unavoidable circumstances or scarcities of appropriate housing, the youth must be transported or accompanied to a temporary shelter:** The shelter must be able to provide age-appropriate safety, security and services, and supervision if available.

• **Exit counseling:** Exit counseling has been provided, including at a minimum, a discussion between staff and the youth of exit options, resources, and destinations appropriate for their well-being and continued progress, possibly including continued follow-up.

• **A course of further follow-up treatment or services:** Follow-up treatment or services (e.g., incremental family reunification, formal or informal counseling, etc.) has been prescribed and scheduled, via referral, or on a non-residential, drop-in, or appointment basis.

• **A follow-up meeting or series of staff/youth meetings or contacts has been scheduled:** To be held after youth has departed the program.

• **A “package” of such things as maps, information about local shelters and resources:** “Package” may also include a phone card, fare tokens, healthy snacks, etc.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

### 4.37 Project Completion Status

**Rationale:** To identify whether the youth completed the project or exited without completion.

**Collection Point(s):** At project exit.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Choose one response category that describes the youth’s project completion status. If the youth left early, was expelled or was otherwise involuntarily discharged from the project, choose the major reason for leaving.

**Data Element Fields: 4.37 Project Completion Status**

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Project Completion Status</strong></td>
<td>Completed project</td>
</tr>
<tr>
<td></td>
<td>Youth voluntarily left early</td>
</tr>
<tr>
<td></td>
<td>Youth was expelled or otherwise involuntarily discharged from project</td>
</tr>
</tbody>
</table>
Response Category Descriptions:

- “Completed project”: The youth completed the project.
- “Youth voluntarily left early”: The youth voluntarily terminated from the program to pursue other opportunities or with no definite plan.
- “Youth was expelled or otherwise involuntarily discharged from project”: The youth was involuntarily terminated from the program with no plan or invitation to return.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** The universe of clients that the data is to be collected on has changed from All Clients to Head of Household, Adults and Unaccompanied Youth to exclude the children of youth from data collection.

### 4.38 Family Reunification Achieved

**Rationale:** To identify youth that achieved family reunification.

**Collection Point(s):** At project exit.

**Subjects:** Head of Household, Adults and Unaccompanied Youth.

**Federal Partner Requiring Collection:** HHS: RHY.

**Data Collection Instructions:** Choose one response category to indicate whether family reunification was achieved at project exit.

**Data Element Fields:** **4.38 Family Reunification Achieved**

<table>

# HUD: ESG Program Specific

Emergency Solutions Grant (ESG) is a program of the U.S. Department of Housing and Urban Development - Administered by the office of Special Needs Assistance Programs (SNAPS), a component of Community Planning and Development (CPD)

*For ESG Program information go to: https://www.HUDExchange.info/esg/*

The elements shown are only those in which at least one ESG program component is required to collect information.

\[ \text{X} = \text{data collection is required} \]

\[ ? = \text{data collection is determined by how the CoC has structured the coordinated assessment in their area. Placement of the element would be required for any project that is conducting a coordinated assessment. This may be across multiple projects or sited in a central access point or coordinated intake center.} \]

### 4.14E Bed-night Date

**Rationale:** To determine each bed-night utilized by a client in a night-by-night shelter.

**Collection Point(s):** At project entry and update

**Subjects:** All clients.

**Data Collection Instructions:** Use the methodology built into the HMIS system to record the date of each night a client stays in a bed. This may be a manual date entry, scan card system, check off, etc.

**Data Element Fields:** 4.14E Bed-night Date

<table>
<thead>
<tr>

**Response Category Descriptions:** None

**Special Considerations:** None
Changes from 2014 – Version 2 Data Standards: This element has been placed within the data-standards to provide a clear place for the functionality within an HMIS to record night-by-night shelter stays.

**HUD: CoC Program Specific**

Continuum of Care (CoC) is a program of the U.S. Department of Housing and Urban Development – Administered by the office of Special Needs Assistance Programs (SNAPS), a component of Community Planning and Development (CPD)

For CoC Program information go to: [https://www.HUDExchange.info/coc/](https://www.HUDExchange.info/coc/)

The elements shown are only those in which least one CoC program component is required to collect information.

- **X** = data collection is required
- *** = data collection is required only for Supportive Services Only components which are funded to provide Street Outreach
- **? = data collection is determined by how the CoC has structured the coordinated assessment in their area. Placement of the element would be required for any project that is conducting a coordinated assessment. This may be across multiple projects or sited in a central access point or coordinated intake center.

4.14C Services Provided: HOPWA

**Rationale:** To determine the services provided to clients during project participation.

**Collection Point(s):** Update as services are provided – each time services are provided. HOPWA requires that all stayers at the end of the grant operating year, prior to the generation of their Annual Report (CAPER or APR), update services for all clients.

**Subjects:** All clients.

**Federal Partner Requiring Collection:** HUD: HOPWA.

**Data Collection Instructions:** Services should be recorded for the client in the household with HIV/AIDS to whom they were provided; a service that benefits the whole household may be recorded solely for the head of household. For each service provided, projects should record the service date and service type.
Data Element Fields: 4.14C Services Provided: HOPWA

Response Category Descriptions: HOPWA has identified the service responses as required by all HOPWA funded projects.

Special Considerations: None

Changes from 2014 – Version 2 Data Standards: None

4.15A Financial Assistance: HOPWA

Rationale: To track financial assistance provided to clients in Permanent Housing Placement or STRMU during project participation.

Collection Point(s): Update as required – each time financial assistance is provided.

Subjects: Head of household who receives Financial Assistance from HOPWA through Permanent Housing Placement (PHP) or Short-Term Rent, Mortgage, Utility Assistance (STRMU)

Federal Partner Requiring Collection: HUD: HOPWA.

Data Collection Instructions: Financial Assistance records payments made by the project on behalf of or for the benefit of the client. For each instance of financial assistance provided, there should be one and only one record created. Records of financial assistance should be attached to the head of household.

Data Element Fields: 4.15A Financial Assistance: HOPWA

<table>
<thead>
<tr>

Response Category Descriptions: Financial Assistance is to record HOPWA funding provided to a client. Components of the HOPWA program (PHP and STRMU) are only allowed to provide financial assistance to the items indicated with an “X” above. For specific program information on HOPWA refer to guidance provided by the program at https://www.HUDExchange.info/hopwa/

Special Considerations: None.

Changes from 2014 – Version 2 Data Standards: None

4.39 Medical Assistance

Rationale: Medical assistance information is important to determine whether HIV positive clients are accessing medical assistance benefits for which they may be eligible.

Collection Point(s): At project entry and project exit. Update during project stay as needed.

Subjects: All household members with HIV/AIDS.

Federal Partner Requiring Collection: HUD: HOPWA.

Data Collection Instructions: Enter the date on which the information was collected. For each source of medical assistance listed below, determine if the client is presently receiving the medical assistance specified. Clients may identify multiple sources of medical assistance. If the client is not receiving medical assistance, enter the reason why such insurance is not being received.

Changes from 2014 – Version 2 Data Standards: None
4.47 T-cell (CD4) and Viral Load

**Rationale**: To measure the extent to which housing impacts health of persons with HIV/AIDS.

**Collection Point(s)**: At project entry, update, annual assessment and project exit.

**Subjects**: Only Clients funded in a HOPWA project presenting with HIV/AIDS

**Federal Partner Requiring Collection**: HUD:HOPWA.

**Data Collection Instructions**: Indicate T-cell count and viral load measurement at 6 month intervals beginning at project entry through project exit. At a minimum for clients staying one year or more, the data must be collected at annual assessment. The updated data (6 month collection) of t-cell and viral load may be entered on different dates as information is available.

**Data Element Fields**: **4.47 T-cell (CD4) and Viral Load**

<table>

</tr>
</tbody>
</table>

**Response Category Descriptions**: None.

**Special Considerations**: This data, as is all HIV/AIDS data, is confidential, covered under special law, and may not be shared without the expressed consent of the client. Providing the information is completely voluntary on the client’s part and failure to report (i.e. client doesn’t know or client refused) will not be considered in data quality for either the CoC or the HOPWA program.

**Changes from 2014 – Version 2 Data Standards**: This is a new data element.
HUD: RHSP Program Specific

Rural Housing Stability Assistance Program (RHSP) is program of the U.S. Department of Housing and Urban Development – Administered by the office of Special Needs Assistance Programs (SNAPS), a component of Community Planning and Development (CPD)

For RHSP Program information go to: https://www.HUDExchange.info/rhsp/

4.40 Worst Housing Situation

Rationale: To identify persons who are in the worst housing situations in a geographic area and are being served through the Rural Housing Stability Assistance Program (RHSP), when implemented.

Collection Point(s): At project entry.

Subjects: All clients.

Federal Partner Requiring Collection: HUD: RHSP.

Data Collection Instructions: Choose one response category to indicate whether the household is currently residing in a worst housing situation.

Data Element Fields: 4.40 Worst Housing Situation

<table>
<thead>

Special Considerations: None.

Changes from 2014 - Version 2 Data Standards: None.

4.41 Veteran’s Information

Rationale: To collect a detailed profile of veterans experiencing homelessness and to help identify clients who may be eligible for VA projects and benefits.

Collection Point(s): At client record creation or at the first project entry entered by a project collecting this data element.

Subjects: All persons who answered “Yes” to HMIS Element 3.7 - Veteran Status.

Federal Partner Requiring Collection: VA [refer to VA Program Specific page]

Data Collection Instructions: In separate fields, record the years in which the client entered / separated from military service, experience in theatres of operations, branch of service, and discharge status. For veterans who served in more than one branch of the military, select the branch in which the veteran spent the most time. In the event that a client’s discharge status is upgraded during enrollment, the record should be edited to reflect the change.

Data Element Fields: 4.41 Veteran’s Information

### 4.42 Percent of AMI

**Rationale:** To document eligibility for SSVF programs.

**Collection Point(s):** At project entry.

**Subjects:** Head of household.

**Federal Partner Requiring Collection:** VA [refer to VA Program Specific page]

**Data Collection Instructions:** Indicate household income as a percentage of area median income (AMI), as published annually by HUD (http://www.huduser.org).

**Data Element Fields:** 4.42 Percent of AMI

<table>
<thead>
<tr>
<th>Field Names</th>
<th>Data Types/Response Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Household Income as a Percentage of AMI</td>
<td></td>
</tr>

<td></td>
</tr>
<tr>
<td>Greater than 50%</td>
<td></td>
</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** Percent of AMI may not be auto-calculated by the HMIS application; it must be entered by the user.

**Changes from 2014 - Version 2 Data Standards:** None

### 4.43 Last Permanent Address

**Rationale:** To record the last address for persons experiencing homelessness or the current address for persons at-risk of homelessness.

**Collection Point(s):** At project entry.

**Subjects:** Head of household and adults.

**Federal Partner Requiring Collection:** VA [refer to VA Program Specific page]

**Data Collection Instructions:** Record the street address, city, state, and ZIP code of the apartment, room, or house where the client last lived for 90 days or more. Addresses of emergency shelters should NOT be recorded here. In a separate field, record the address data quality.

**Data Element Fields:** 4.43 Last Permanent Address

<table>
<thead>

</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** None

### 4.44 HP Screening Score

**Rationale:** To record the Homelessness Prevention (HP) screening threshold score

**Collection Point(s):** At project entry.

**Subjects:** Head of household

**Federal Partner Requiring Collection:** VA [refer to VA Program Specific page]

**Data Collection Instructions:** SSVF grantees must enter the homelessness prevention threshold score for each at-risk household served in the project as was calculated in the homelessness prevention screening/assessment.

**Data Element Fields:** **4.44 HP Screening Score**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Response Category Descriptions:** None.

**Special Considerations:** None.

**Changes from 2014 - Version 2 Data Standards:** This is a new data element.

### 4.45 VAMC Station Number

**Rationale:** To record the identification of the VA Medical Center the household receiving SSVF services is associated with.

**Collection Point(s):** At project entry.

**Subjects:** Head of household

**Federal Partner Requiring Collection:** VA [refer to VA Program Specific page]

**Data Collection Instructions:** SSVF grantees must enter the VAMC Station Number of each household. The VA will provide SSVF grantees with the station number that corresponds to their service location.

**Data Element Fields:** **4.45 VAMC Station Number**

<table>
<thead>

**Program Specific Data Element Collection Summaries will be available for each federal partner program in the HMIS Program Manuals.**
### Exhibit 2: Federal Partner Grant Programs, Eligible Components/Activities and HMIS Project Types

This table serves as a source reference for:

1. Identification of all HMIS Federal Partner programs and components use of HMIS.
2. Identification of the Program and Program Component/Activity Abbreviations used throughout the Data Manual.
3. Identification of the HMIS Project Type [element 2.4] required association with each Component/Activity.
